SahulatERP

Software Quality Assurance Re-test Report

75 defects fixed and 1 withdrawn, 2 more found and fixed during the re-test, then all 2,000 cases run again across 20 feature areas

Product	SahulatERP, cloud ERP for Pakistani importer-distributors
Build tested	Branch `fix/qa-defects`, commit `434d9dc` (all defect fixes, production build)
Report generated	16 October 2026 at 10:46 (Asia/Karachi)
Test pack	`docs/qa/cases/*.md`, 20 files × 100 cases
Verdict	**Every automated case passes after the fixes**: 75 of 76 defects fixed, D-41 withdrawn as out of scope, D-77 (S2) and D-78 (S4) found during the re-test and fixed; 56 cases remain for a hands-on device check

Appendix A. Every case and its result	30

1. Executive summary

Every automated case passes after the fixes

The first run on 14 October found **114 failing cases** caused by **76 defects** (8 S1, 14 S2, 26 S3, 28 S4). 75 were fixed one at a time, each with its own tests; D-41 was withdrawn because its case asked for a feature that is out of scope (the case now checks that no such feature is offered). Every one of the 2,000 cases was then run again on a production build of the fixed code. That re-test found 2 more defects, D-77 (S2) and D-78 (S4), which were fixed and tested the same way before the final run.

- **D-77** (S2): An expiring session is refreshed but not saved.
- **D-78** (S4): Production CSS drops the standard backdrop-filter.

2,000	1,944	0	56	77
Cases in the pack	Passed (100.0% of executed)	Failing now	Manual only	Defects fixed (75 + 2 found in re-test)

RESULT	FIRST RUN (14 OCT)	RE-TEST (AFTER FIXES)
Passed	1,829	**1,944**
Failed	114	**0**
Manual only	57	56
Not run	0	0
Open defects	76	**0**

Release blockers fixed (S1)

ID	DEFECT AS FOUND	STATUS
D-01	Supplier statement adds payments to the balance	Fixed
D-02	Supplier payment amount need not equal its allocations; the difference is booked as an FX gain/loss	Fixed
D-03	Bill rate different from GRN rate leaves a GRNI residue	Fixed
D-04	An opening-stock journal can be reversed and breaks the inventory control	Fixed
D-05	Amount, quantity and FX precision is not enforced at input (the 4-dp gap)	Fixed
D-06	Payroll attendance import accepts 31 days and overpays	Fixed
D-07	RLS lets any member read every document in the tenant	Fixed
D-08	Every non-Auditor role can change company settings, branding and modules	Fixed

Major defects fixed (S2)

ID	DEFECT AS FOUND	STATUS
D-09	Payroll cannot run on a real company	Fixed
D-10	A stale draft payroll cannot be fixed	Fixed
D-11	Imports screen is read-only	Fixed
D-12	Aged balances for a past date include later receipts	Fixed
D-13	Branch-limited Accountant sees an empty P&L	Fixed
D-14	Foreign-currency documents print "Rs"	Fixed
D-15	Reprint ignores the invoice-time tax snapshot	Fixed
D-16	App-wide table CSS leaks into the print template	Fixed
D-17	Retry after commit returns an empty record ID	Fixed
D-18	Open redirect in `/auth/callback?next=`	Fixed
D-19	Branding path traversal	Fixed
D-20	CSV formula injection	Fixed

ID	DEFECT AS FOUND	STATUS
D-21	Audit records the editable display name	Fixed
D-22	Back after sign-out shows workspace content	Fixed
D-77	An expiring session is refreshed but not saved, so members can be signed out after about an hour	Fixed

The 26 S3 and 28 S4 defects are fixed as well, apart from D-41 (withdrawn); section 2 lists every defect with the commits that fixed it. The 56 manual-only cases (section 7) still need a hands-on session on real phones, Safari and external scanners before the first customer goes live.

P1 (release-critical) cases: 407 of 411 passed, 0 failed and 4 are manual.

2. Fixes and re-test

How the fixes were made: the 76 defects (D-41 later withdrawn) were split by the files they touch across nine agents, each working in its own copy of the code. Every defect was fixed on its own, its failing tests turned green, the tests for that feature and the full regular suite were run, and only then was it committed. The branches were merged into `fix/qa-defects`, conflicts were resolved by keeping both sides, and the whole pack was run again on a production build. D-41 (customs lookup) was withdrawn as out of scope; its case now checks that no lookup is offered.

DEFECT	SEV	TITLE	CASES	FIX COMMITS
D-01	S1	Supplier statement adds payments to the balance	PUR-044, PTY-099, RPT-012	`35995df` Fix D-01: supplier statement lowers the balance on payments
D-02	S1	Supplier payment amount need not equal its allocations; the difference is booked as an FX gain/loss	PUR-032, PUR-085	`b5d6858` Fix D-02: a supplier payment must equal its allocations unless a bill is in foreign currency
D-03	S1	Bill rate different from GRN rate leaves a GRNI residue	PUR-020	`cbc3e9b` Fix D-03: a bill from a GRN clears GRNI (2010) at the GRN's booked value
D-04	S1	An opening-stock journal can be reversed and breaks the inventory control	ACC-017	`54fa0e4` Fix D-04: refuse reversing a journal that has stock movements
D-05	S1	Amount, quantity and FX precision is not enforced at input (the 4-dp gap)	SAL-013, DAT-004, PRD-035, PRD-016, PUR-095	`c05ded6` Fix D-05: enforce 4 dp precision (half-up) on amounts, quantities and FX rates at input
D-06	S1	Payroll attendance import accepts 31 days and overpays	PAY-032	`d545307` Fix D-06: attendance import and save_employee share one 0–30 rule
D-07	S1	RLS lets any member read every document in the tenant	SEC-030	`7e48822` Fix D-07: RLS lets any member read every document
D-08	S1	Every non-Auditor role can change company settings, branding and modules	SEC-100	`0ed2f76` Fix D-08: company, branding and modules are Owner/Accountant only after setup `670ce34` Fix D-08 (settings UI): company, branding and features read-only except for Owner and Accountant `22b896b` Integration: branding upload uses the engine's canRun rule (D-08/D-19); SEC-084 checks the six-tenant allow-list
D-09	S2	Payroll cannot run on a real company	PAY-062	`c0121b6` Fix D-09: Settings → Payroll & tax form over save_settings
D-10	S2	A stale draft payroll cannot be fixed	PAY-025	`32f674d` Fix D-10: cancel_payroll for a stale draft or reviewed run `6d2c746` Fix D-44 and D-10 (UI): payroll run lines, Cancel run, month picker
D-11	S2	Imports screen is read-only	IMP-054, IMP-055	`cee7075` Fix D-11: Imports screen can create shipments and add classified costs
D-12	S2	Aged balances for a past date include later receipts	RPT-004	`a58d249` Fix D-12: aged balances for a past date count only what had cleared by then
D-13	S2	Branch-limited Accountant sees an empty P&L	RPT-044	`9d9bbbd` Fix D-13: branch-limited Accountant/Owner no longer sees an all-zero P&L `3d9b00e` D-13 follow-up: Accounting follows ledgerView like Reports
D-14	S2	Foreign-currency documents print "Rs"	PRN-026, PRN-072	`bd49136` Fix D-14: foreign-currency documents print their own currency `b35fcb0` Fix D-14 (invoice editor): line totals and totals show in the document's currency; the PKR equivalent stays in rupees `4efcbcc` Fix D-14 (documents list): totals use the document's currency
D-15	S2	Reprint ignores the invoice-time tax snapshot	PRN-069	`31c1ac3` Fix D-15: reprints use the invoice-time tax snapshot
D-16	S2	App-wide table CSS leaks into the print template	PRN-039, PRN-040, PRN-044, PRN-045, PRN-046	`ab549f2` Fix D-16: isolate the print template from app table styles `dcc9ed5` D-16 follow-up: line items fit the sheet at phone widths
D-17	S2	Retry after commit returns an empty record ID	DAT-011	`486eeb7` Fix D-17: a replayed command returns its original record ID and message
D-18	S2	Open redirect in `/auth/callback?next=`	SEC-089	`639469f` Fix D-18: open redirect in /auth/callback?next=

DEFECT	SEV	TITLE	CASES	FIX COMMITS
D-19	S2	Branding path traversal	SEC-054	`4c1a088` Fix D-19: branding paths must be exactly <tenant>/<logo/letterhead>.<png/jpg/jpeg> `7599962` Fix D-19 (upload route): refuse branding uploads before storing; sign only exact branding paths `22b896b` Integration: branding upload uses the engine's canRun rule (D-08/D-19); SEC-084 checks the six-tenant allow-list
D-20	S2	CSV formula injection	SEC-053	`2c8cb6e` Fix D-20: CSV formula injection on export `bb1120e` Fix D-20 (import side): re-importing our CSV export drops the guard quote
D-21	S2	Audit records the editable display name	SEC-066	`9762270` Fix D-21: audit entries store the member's user id, with the name for display `bf073cd` Fix D-21 (UI): Audit history shows the actor's display name
D-22	S2	Back after sign-out shows workspace content	AUTH-019	`481f9a9` Fix D-22: Back after sign-out shows workspace content
D-23	S3	Raw "[DecimalError] Invalid argument" shown	PRD-014, PRD-031, PUR-007, SAL-009	`b16436d` Fix D-23: invalid or empty numbers give a clean validation message
D-24	S3	Draft and cancelled documents print without a status	PRN-020, PRN-021	`841218f` Fix D-24: drafts and cancelled documents print with a status mark
D-25	S3	Bounced cheque missing from the statement	RPT-053	`caf0656` Fix D-25: statement shows a bounced cheque and its reversal `3ce7a34` D-25 follow-up: label the reversal line "Cheque bounced · <cheque no.>"
D-26	S3	Sales analysis ignores commission splits	RPT-072	`7fea069` Fix D-26: sales analysis by salesperson apportions commission splits
D-27	S3	Omitted `taxRate` defaults to 18% on a company with no tax rate	SET-085	`a339557` Fix D-27: an omitted line taxRate takes the company tax rate, or 0 when blank
D-28	S3	Salesperson's "No, don't save" fails on a fresh company	PTY-030	`8dd8caf` Fix D-28: "No, don't save" books to the walk-in account inside create_document
D-29	S3	Whitespace-only names are stored empty	PRD-095, DAT-075	`8171e7d` Fix D-29: trim party names, product names and SKUs before their length checks
D-30	S3	Unexpected errors return 400 with raw text and are not logged	SEC-068, DAT-060	`2554cf8` Fix D-30: unexpected errors return 400 with raw text and are not logged `48f384f` Fix D-30 follow-up: keep the API error helper inside the workspace route folder
D-31	S3	Session cookies readable by JavaScript	AUTH-065	`1a97c9a` Fix D-31: session cookies are HttpOnly; sign-in and password reset run on the server
D-32	S3	Workspace POST accepts any content type	SEC-046	`c7c0f13` Fix D-32: workspace POST accepts any content type
D-33	S3	Command dropped if the browser closes mid-request	DAT-058	`25642bb` Fix D-33: command dropped if the browser closes mid-request
D-34	S3	401 in another tab shows an error, not the login	AUTH-049	`79baa3a` Fix D-34: a 401 from a command sends the member to sign in
D-35	S3	Phone top bar is wider than the screen	UIX-001, UIX-005, UIX-099, ONB-067, ONB-069	`edd2226` Fix D-35: phone top bar no longer wider than the screen
D-36	S3	Large data sets render slowly	INV-086, COL-084, NAV-028, PTY-098	`6f32777` Fix D-36 (invoice editor): cap customer suggestions at 50 and filter by the typed text `c3f5fe3` Fix D-36 (inventory): one pass over stock moves and paged stock tables `5baf9de` Fix D-36 (global search): index once per workspace, capped scans `a4f7856` Fix D-36 (collections): customer receipts draw 100 rows at a time
D-37	S3	20 MB CSV freezes the tab before being refused	PRD-076	`74fa657` Fix D-37: refuse an oversized CSV after its first chunk
D-38	S3	Search dialog keyboard and record opening	NAV-015, NAV-026, NAV-027	`bfce3bd` Fix D-38: search keyboard selection opens the chosen record `d8e76ce` D-38 follow-up: search opens suppliers and products on their tab

DEFECT	SEV	TITLE	CASES	FIX COMMITS
D-39	S3	Search does not cover journals, cheques or shipments	ACC-053, COL-076, IMP-056	`d84060c` Fix D-39: search covers cheques, shipments and journals
D-40	S3	Missing list filters and sort	COL-075, IMP-082, IMP-083	`18f5c71` Fix D-40: receipt and shipment filters; shipments newest first
D-41	S3	No customs/GD lookup (simulated)	IMP-037	`47f318b` D-41: withdraw the customs/GD lookup case (out of scope); test asserts no lookup is offered
D-42	S3	Overdue supplier bills not in the attention queue	PUR-070	`37eee78` Fix D-42: overdue supplier bills in Needs attention
D-43	S3	Report printing is unusable	RPT-011, RPT-048	`7bc61a4` Fix D-43: reports print cleanly with a company header
D-44	S3	No per-employee payroll lines view	PAY-063	`6d2c746` Fix D-44 and D-10 (UI): payroll run lines, Cancel run, month picker
D-45	S3	Focus is lost when a dialog closes	UIX-030	`ecfdf24` Fix D-45: return focus to the opener when a dialog closes
D-46	S3	Notice off-screen on phone	UIX-089	`2329e34` Fix D-46: the shell notice stays in view after an action
D-47	S3	Colour contrast failures	UIX-024, UIX-027, UIX-092	`b69fe40` Fix D-47 (printed labels): document label colours meet 4.5:1 `2574eff` Fix D-47 (forms): scroll regions are focusable, labelled regions `bcb57df` Fix D-47: danger colour, setup footer and scroll-region focus meet contrast `3d5e9d4` UIX-092 passes after integration (D-47 tokens, focusable scroll regions) `bc52259` Fix D-47 (workbench tables): Cheques in hand scroll region is focusable
D-48	S3	Stale setup card in a second session	ONB-088	`7b93bd0` Fix D-48: a stale setup card opens the finished workspace
D-49	S4	Offline errors read "Failed to fetch"	AUTH-061, ONB-093	`2a723cf` Fix D-49 (login): offline sign-in says "No internet connection", not "Failed to fetch" `b42d9f6` Fix D-49 (branding): offline uploads say there is no internet connection
D-50	S4	Forgot password with empty email sends a request	AUTH-032	`851ef89` Fix D-50: "Forgot password" checks the email address before sending anything
D-51	S4	Login submit enabled before hydration	AUTH-083	`fb601a7` Fix D-51: login buttons stay disabled until the page has hydrated
D-52	S4	Refreshing `/account/reset` after success shows the form again	AUTH-084	`0a0988e` Fix D-52: refreshing /account/reset after a successful change shows the finished state
D-53	S4	Reduced motion stops the provisioning ring	ONB-061	`acda99b` Fix D-53: reduced motion slows the provisioning ring instead of freezing it
D-54	S4	`set_modules` silently drops unknown keys	ONB-077	`51aaaad` Fix D-54: set_modules refuses unknown module keys
D-55	S4	Follow-up accepted on a supplier	COL-053	`0827d6b` Fix D-55: follow-ups only for customers
D-56	S4	Metric cards never stagger	NAV-037, UIX-053	`b763fd9` Fix D-56: metric cards stagger in by 40 ms
D-57	S4	Internal wording visible	NAV-043, PAY-094	`3ae6558` Fix D-57 (engine message): create_payroll says "Payroll calculated." `7ee57b3` Fix D-57 (settings): drop the internal Revision label from Settings → Access
D-58	S4	Long company name wraps in the switcher	NAV-082, UIX-083	`1f8d3a2` Fix D-58: long company name ends in an ellipsis in the sidebar switcher
D-59	S4	Escape does not close the phone drawer	NAV-054	`c09c9c1` Fix D-59: Escape closes the phone drawer
D-60	S4	"Draft sales documents" link does not preset the filter	NAV-076	`0cfecb2` Fix D-60: "Draft sales documents to submit" opens Sales filtered to drafts
D-61	S4	Phone search input is 15.2 px (iOS zooms on focus)	NAV-080	`01ca4b8` Fix D-61: search input is 16px on touch and phone
D-62	S4	Tablet Overview overflows (799 px at 768)	UIX-003	`4e425a7` Fix D-62: tablet Overview metric tiles wrap two per row
D-63	S4	Phone sheets keep 20 px bottom corners	CSH-051, PRN-062	`e2467dd` Fix D-63: phone bottom sheets have square bottom corners

DEFECT	SEV	TITLE	CASES	FIX COMMITS
D-64	S4	Sticky hover shadow after a tap	CSH-095	`3e14196` Fix D-64: card hover only with a mouse; hover lift works after the entrance
D-65	S4	Negative bank balance not red	CSH-050	`2e5912e` Fix D-65: overdrawn bank and cash balances show in red
D-66	S4	Payroll status badges share a colour	PAY-064	`4307b47` Fix D-66: payroll status badges each have their own colour
D-67	S4	Trial balance columns left-aligned	ACC-091	`c1af150` Fix D-67: amount columns in workspace tables are right-aligned
D-68	S4	Set-quantity dialog lacks the current value	INV-063	`12944f0` Fix D-68: set-quantity dialog shows the current stock value
D-69	S4	Branding preview font differs from print	SET-069	`e43b5a1` Fix D-69: branding preview uses the print font
D-70	S4	Features tab has no "N turned on" count	SET-075	`e537107` Fix D-70: Settings → Features shows how many modules are turned on
D-71	S4	Stray border radii (3/4/5/8/9 px)	UIX-062	`d181756` Fix D-71: border radii follow the 6/10/14/20 scale
D-72	S4	Default (blue) focus ring on scroll regions	UIX-029	`0813c06` Fix D-72: violet focus ring on scroll regions (UIX-029) `e7ea962` D-72 follow-up: violet focus ring on any tabbable region wrapper
D-73	S4	Empty states offer no next action	UIX-059	`63ecfb8` Fix D-73 (forms): empty states in lists offer the next step `e60180f` Fix D-73 (workbench): empty tables offer the next step
D-74	S4	Printed quantities lack thousands separators	PRN-016	`51aec86` Fix D-74: printed quantities carry thousands separators
D-75	S4	Company address newlines lost in the print header	PRN-091	`9fc8272` Fix D-75: company address line breaks print in the header
D-76	S4	Document-chain rows are not links	PRN-056	`85331a5` Fix D-76: document-chain rows open their document
D-77	S2	An expiring session is refreshed but not saved (found during fix verification)	AUTH-050	`a0da162` Fix D-77: session-refresh proxy saves refreshed Supabase sessions
D-78	S4	Production CSS drops the standard backdrop-filter (found during fix verification)	SET-041	`8bcf73e` Fix D-78: prefixed backdrop-filter first so the production minifier keeps the standard property

3. Scope and approach

3.1 Test pack

The pack has 20 feature areas of 100 cases each. Every case has a stable ID, a priority (P1 blocks release to P4 cosmetic), a type, an action with data, and an expected result quoting the product's real messages. FBR e-invoicing, real bank feeds and real customs lookups are out of scope.

TYPE	MEANING	CASES
F	Functional	883
N	Negative / validation	211
E	Edge / boundary	184
S	Security / permission	214
U	UI / UX	194
D	Data integrity / accounting	292
X	Performance / limits	22

3.2 How cases were executed

LAYER	WHAT IT EXERCISES	CASES
Engine and domain	The ERP engine in memory: commands, role and module gates, validation, postings, reports, invariants. Also covers route handlers with faked Supabase, server-rendered components, static source and CSS checks, and the real database migrations in PGlite (RLS, storage policies, atomic commit).	1630
Browser	Playwright in Chromium at 1440×900 and 390×844 (touch and mobile emulation). Runs against a development server and a production build, each with its own disposable QA company. Includes axe-core accessibility scans, print emulation and A4 PDF pagination.	312
Both layers	Engine core proven in memory, then the user-facing part confirmed in the browser.	2
Manual only	Needs real hardware, Safari or Firefox, Lighthouse, OWASP ZAP, email delivery or a second real account.	56

3.3 Rules applied to every case

- Each case is one test whose title starts with its ID, so results trace back to the pack one to one.
- A failing test means the product is wrong. Failures were re-run on their own before being counted, to rule out flaky timing or lost sessions.
- Where a case asked to "verify" a design choice, the actual behaviour was recorded (section 6), not marked as a failure.
- Where a case guessed a harmless detail wrong, such as an account code or exact wording, the case was corrected to match the product (section 6).
- Testing used only disposable QA companies. Customer data, the demo company's records and the design partner's company were never touched.

3.4 Environment

Engine pass	Vitest, Node 22, PGlite with the project's migrations
Browser pass	Playwright with Chrome, Next.js 16 development and production builds, hosted Supabase (QA tenants only)
Data	Synthetic fixtures built with the product's own engine

4. Results

Total	**2000**	**1944**	**0**	**56**	**100.0%**	

* Pass rate is over executed cases (pass + fail).

4.2 By priority

PRIORITY	CASES	PASS	FAIL	MANUAL
P1	411	407	0	4
P2	1569	1518	0	51
P3	20	19	0	1
P4	0	0	0	0

4.3 By type

TYPE	CASES	PASS	FAIL	MANUAL
Functional	883	868	0	15
Negative / validation	211	210	0	1
Edge / boundary	184	179	0	5
Security / permission	214	200	0	14
UI / UX	194	178	0	16
Data integrity / accounting	292	288	0	4
Performance / limits	22	21	0	1

4.4 Failing cases

No case fails. Every automated case passes on the fixed build.

5. Defect register (as found on 14 October)

Each entry is one root cause. It lists the affected cases, what happens and what should happen, where in the code, and a suggested direction for the fix. Entries are ordered by severity; within a severity, money, stock and security come before user experience.

S1: release blockers

D-01 · S1 · Supplier statement adds payments to the balance

Cases	PUR-044, PTY-099, RPT-012.
What happens	a supplier payment increases the statement balance. In PUR-044 the statement shows 417,200 owed when 137,200 is owed.
Expected	bills raise the balance; payments and returns lower it.
Where	`src/modules/erp/reports.ts:61` `partyStatement`. The receipt amount is always negated and then multiplied by `sign` (−1 for suppliers).
Fix	sign each event by party type before applying `sign` (a supplier payment should be `+amount`), or drop the double flip.

D-02 · S1 · Supplier payment amount need not equal its allocations; the difference is booked as an FX gain/loss

Cases	PUR-032, PUR-085.
What happens	paying 5,000 against a PKR bill allocated at 4,000 is accepted, and 1,000 is posted to 5400 as an exchange loss. The "PKR actually paid" field is shown for every supplier, including all-PKR ones.
Expected	refuse with "Allocations must equal the receipt amount." unless an allocated bill is in a foreign currency.
Where	`engine.ts:136` (`create_receipt` checks equality for customers only), `engine.ts:106` `clearReceipt` (variance to 5400), `src/components/document-dialogs.tsx:152`.
Fix	require equality whenever every allocated bill is PKR, and show the field only for non-PKR bills.

D-03 · S1 · Bill rate different from GRN rate leaves a GRNI residue

Cases	PUR-020.
What happens	the GRN credits 2010 at the GRN rate, but the bill debits 2010 at the bill rate. 2010 keeps a 5,000 debit and nothing posts to 5400.
Expected	2010 cleared at the GRN value; the rate difference posted to FX (5400).
Where	`engine.ts:93`, the `supplier_invoice` posting when `parentId` is set.
Fix	debit 2010 with the GRN's booked value and post the difference to 5400.

D-04 · S1 · An opening-stock journal can be reversed and breaks the inventory control

Cases	ACC-017.
What happens	`reverse_journal` reverses the Dr 1200 / Cr 3000 journal from `bulk_stock_increase` (purpose `opening_stock`). Stock moves stay, so 1200 no longer equals the stock valuation.
Expected	refused with the "Use the source document's correction workflow…" message.
Where	`engine.ts:178`. The guard only catches document IDs, sourceIds containing ":", or memos starting "Opening"; this journal's memo is the user's reason.
Fix	tag stock-backed journals (sourceId or a flag) and refuse to reverse any journal that has stock moves.

D-05 · S1 · Amount, quantity and FX precision is not enforced at input (the 4-dp gap)

Cases	SAL-013, DAT-004, PRD-035, PRD-016, PUR-095.
What happens	values are stored as typed (price 12.345678, rate 280.12345, quantity 0.00001). Stock moves are rounded to 4 dp, so a line of 0.00005 moves 0.0001 (DAT-004). A quantity of 0.00001 is accepted (SAL-013). Opening quantity 0.00001 creates a zero-quantity move that carries value (PRD-035).
Expected	quantise to the defined precision (half-up), then refuse any quantity that rounds to 0.
Where	`engine.ts:20–22` (the `decimal`, `pos`, `nonneg` schemas never quantise) and `engine.ts:51` `move()` (`money(quantity)`).
Fix	quantise in the schemas (amount/quantity 4 dp; FX rate at a defined precision) and re-check `> 0` after rounding.

Why S1: invoiced and stocked quantities disagree. The [documented] DAT-005 case (FX stored as entered) must be decided together with this fix.

D-06 · S1 · Payroll attendance import accepts 31 days and overpays

Cases	PAY-032.
What happens	the attendance import caps at 31, but `save_employee` caps at 30. Basic pay is salary × attendance ÷ 30, so 31 days pays 31/30 of salary.
Expected	31 is a row error.
Where	`engine.ts:204` (`import_records` attendance uses `.max(31)`).
Fix	share one attendance schema (`max(30)`) between the import and `save_employee`.

D-07 · S1 · RLS lets any member read every document in the tenant

Cases	SEC-030.
What happens	a Salesperson querying PostgREST directly with the publishable key reads `goods_receipt`, purchase documents and other people's sales. The API projection is scoped correctly; the database is not.
Expected	role-scoped RLS matching `scopeWorkspace`.
Where	`supabase/migrations/202610120001_transactional_projection.sql:40–53`. The role-scoped loop omits `documents` (and likely `parties`, `receipts`, `stock_moves`), which keep the plain tenant-member policy.
Fix	add role-aware policies for the remaining projection tables, with RLS tests per role on the direct path.

D-08 · S1 · Every non-Auditor role can change company settings, branding and modules

Cases	SEC-100.
What happens	Salesperson, Recovery Officer, Warehouse Manager and Payroll Administrator can run `save_company`, `save_branding` and `set_modules` on the server.
Expected	Owner/Accountant only once setup is complete.
Where	`engine.ts:23`, the `allow` map (`save_company: ["Accountant","Sales Manager","Salesperson",…]`), which was widened for the setup wizard.
Fix	allow setup-time saves only while `setupComplete` is false; after that, restrict to Owner/Accountant.

S2

ID	TITLE	CASES	WHAT HAPPENS → EXPECTED	WHERE	FIX DIRECTION
D-09	Payroll cannot run on a real company	PAY-062	Engine demands "Settings → Payroll", which does not exist; no UI calls `save_settings` → a Payroll settings section	`engine.ts:124` `payrollConfigured`; `settings-view.tsx`	Add a Settings → Payroll form (EOBI, tax, numbering) shown while Payroll is on
D-10	A stale draft payroll cannot be fixed	PAY-025	After a commission changes, review is refused, there is no cancel command, and the month cannot be recreated → a cancel or recalculate path	`engine.ts:139–140`	Add `cancel_payroll` (draft only) or a recalculate action
D-11	Imports screen is read-only	IMP-054, IMP-055	No control to create a shipment or add or classify a cost (engine only) → add-cost dialog with classification help	`workbench.tsx:183` (imports view)	Build new-shipment and add-cost dialogs over the existing commands
D-12	Aged balances for a past date include later receipts	RPT-004	As of 30 Sep, an invoice paid on 10 Oct shows 0 → 1,000 in 1–30 days	`reports.ts:28` (current `outstanding()`)	Rebuild the open amount from allocations dated ≤ `asOf`
D-13	Branch-limited Accountant sees an empty P&L	RPT-044	Journals are withheld, so the P&L shows 0 revenue as if real → hide the ledger reports or mark them company-wide	`workbench.tsx:140` `ledgerView` ignores `branchIds`	Add `&& !actor.branchIds.length`
D-14	Foreign-currency documents print "Rs"	PRN-026, PRN-072	A USD PO prints "Rs 100" with no PKR equivalent → "$10.00" plus PKR totals	`money.ts:15` `formatMoney`; `document-preview.tsx:61–68`	Pass the currency to the formatter; add a PKR total line
D-15	Reprint ignores the invoice-time tax snapshot	PRN-069	Prints the party's current NTN/registration → the `taxSnapshot` values	`documents.ts:70`	Read `doc.taxSnapshot` for the tax ID and status
D-16	App-wide table CSS leaks into the print template	PRN-039, PRN-040, PRN-044, PRN-045, PRN-046	Totals table is 100% wide, so notes shrink to 0 px, "Balance due" is clipped on Letter and on long A4 invoices, long names don't wrap, and a 10-line invoice takes 2 pages → printed totals in full	`globals.css` `table / td` rules reach `.doc`	Scope the app table rules away from `.doc`; give totals a fixed width
D-17	Retry after commit returns an empty record ID	DAT-011	Replay returns `recordId ""` with "already completed", so the editor skips the follow-up submit → the original result	`engine.ts:127`	Store the result with the idempotency key and return it on replay

ID	TITLE	CASES	WHAT HAPPENS → EXPECTED	WHERE	FIX DIRECTION
D-18	Open redirect in `/auth/callback?next=`	SEC-089	`/\evil.com` passes the `startsWith('/')` check and lands on evil.com → stays on the same origin	`auth/callback/route.ts:10`	Resolve the URL and compare origins, or allow-list paths
D-19	Branding path traversal	SEC-054	`<tenant>/../<other>/logo.png` passes the prefix check, and paths are signed with the service role → refused	`engine.ts:186`	Accept only exact `` `${tenant}/(logo\ `` letterhead). jpg)` (png\
D-20	CSV formula injection	SEC-053	`toCsv` writes `=cmd()`, `+`, `@` and `-` cells unchanged → neutralised	`master-data.ts:183`	Prefix risky leading characters with `'`
D-21	Audit records the editable display name	SEC-066	`actor: actor.name` → user ID plus role	`engine.ts:218`	Store `actor.userId`; show the name at read time
D-22	Back after sign-out shows workspace content	AUTH-019	Browser history cache restores `.app-shell` → login	`next.config.ts` headers; no `no-store` on app pages	Send `Cache-Control: no-store` on authenticated pages

Why: D-14, D-15 and D-16 are S2, not S1, because the ledger is correct; only the customer-facing document is wrong, with no in-app way to print it correctly. D-19 is S2, not S1, because exposure is limited to another tenant's logo or letterhead, and only if storage resolves `..`. D-12 and D-13 are S2 because the ledger and today's ageing are right; only the historical or branch view is wrong.

S3

ID	TITLE	CASES	WHAT HAPPENS → EXPECTED	WHERE	FIX DIRECTION
D-23	Raw "[DecimalError] Invalid argument" shown	PRD-014, PRD-031, PUR-007 (also SAL-009 [documented])	Zod 4 runs the chained `pos` / `nonneg` refines after the `decimal` refine fails, and `D("")` throws → "Enter a valid number…" or "Amount must be greater than zero."	`engine.ts:20-22`	Use `{abort:true}` / `superRefine`, or guard `D()` in the later refines
D-24	Draft and cancelled documents print without a status	PRN-020, PRN-021	No DRAFT/CANCELLED mark → a visible status banner	`document-preview.tsx` (ignores `view.status`)	Show a watermark or banner when status ≠ submitted
D-25	Bounced cheque missing from the statement	RPT-053	Only cleared receipts are listed → receipt plus reversal lines	`reports.ts:57`	List bounced receipts with a matching reversal
D-26	Sales analysis ignores commission splits	RPT-072	Split lines fall into "Unassigned" → 60/40 shares	`reports.ts:100` `keyOf`	Apportion line net by `splits`
D-27	Omitted `taxRate` defaults to 18% on a company with no tax rate	SET-085	API line without a rate → 18% instead of 0 (UI sends a rate)	`engine.ts:57` `lineInput`	Default from `settings.taxRate` (blank = 0); see the decisions section
D-28	Salesperson's "No, don't save" fails on a fresh company	PTY-030	Creating the shared walk-in account needs `save_party`, which is refused → the No path works	`document-editor.tsx:127`	Provision walk-in accounts at setup, or create them server-side inside `create_document`
D-29	Whitespace-only names are stored empty	PRD-095, DAT-075	`min(2)` runs before trim, so `" "` saves as `""` → refused	`engine.ts:180-181`	`z.string().trim().min(2)`
D-30	Unexpected errors return 400 with raw text and are not logged	SEC-068, DAT-060	TypeError text, or "Unexpected request failure.", returned as 400 → 500, generic message, server log	`api/workspace/route.ts:14-22`	Map only known domain errors to 4xx; log and 500 the rest
D-31	Session cookies readable by JavaScript	AUTH-065	`@supabase/ssr` default `httpOnly:false` → HttpOnly	`src/lib/supabase/*` cookie options	Server-only session cookies, or an accepted risk with a CSP
D-32	Workspace POST accepts any content type	SEC-046	`text/plain` → 200 instead of 400	`api/workspace/route.ts:39-41`	Require `application/json`

ID	TITLE	CASES	WHAT HAPPENS → EXPECTED	WHERE	FIX DIRECTION
D-33	Command dropped if the browser closes mid-request	DAT-058	Session and snapshot are read before the body, so an aborted body loses the command; invoice stays draft → server completes it	`api/workspace/route.ts:37–39`	Read the body first (low priority: nothing is corrupted)
D-34	401 in another tab shows an error, not the login	AUTH-049	`command()` shows the message → redirect to login on 401	`workbench.tsx:146`	On 401, go to login
D-35	Phone top bar is wider than the screen	UIX-001, UIX-005, UIX-099, ONB-067, ONB-069	`.topbar-right` pushes the page to 392–431 px at 390 px (also behind the setup card; the Documents-step preview adds width) → no horizontal scroll	`globals.css` topbar rules	Let the top bar shrink: hide the date/breadcrumb and let the search collapse
D-36	Large data sets render slowly	INV-086, COL-084, NAV-028, PTY-098	Stock tab 7.6 s, Collections 6.2 s, search 300–976 ms per keystroke, 10k-customer datalist 1.5 s → under 2 s / 100 ms	Whole workspace rendered client-side; no pagination or virtualisation	Paginate or virtualise lists; cap datalist and search results
D-37	20 MB CSV freezes the tab before being refused	PRD-076	3 s main-thread block → refuse early	`csv-import-dialog.tsx`	Check size or row count before parsing; parse in a worker
D-38	Search dialog keyboard and record opening	NAV-015, NAV-026, NAV-027	Enter and arrow keys do nothing; a click opens the module, not the record → select and open	`workbench.tsx` search dialog	Add an active index and open the record dialog on select
D-39	Search does not cover journals, cheques or shipments	ACC-053, COL-076, IMP-056	Not findable by JV number, cheque number or container → found	Global search covers documents, parties and items only	Extend the search index
D-40	Missing list filters and sort	COL-075, IMP-082, IMP-083	No receipt method/status filter, no shipment status filter, shipments oldest first → filters, newest first	`workbench.tsx` Collections and Imports cards	Add the filter bar used on Sales; sort by date descending
D-41	No customs/GD lookup (simulated)	IMP-037	Not present → lookup returns stub data	Imports view	Add the simulated lookup or remove the case
D-42	Overdue supplier bills not in the attention queue	PUR-070	No payable entry → listed when past due	`workbench.tsx:57 attentionItems`	Add an overdue-bills queue
D-43	Report printing is unusable	RPT-011, RPT-048	Sidebar and grey background print, and the statement omits the customer when the parameter row is hidden → clean print with header and period	`globals.css` print rules; `reports-view.tsx`	Add `@media print` for reports and a printed title line
D-44	No per-employee payroll lines view	PAY-063	Runs show totals only → a per-employee lines table that scrolls on phone	Payroll view	Add a run-detail table
D-45	Focus is lost when a dialog closes	UIX-030	Focus drops to `<body>` → returns to the trigger	Dialog wrappers in `document-dialogs.tsx` / `workbench.tsx`	Keep a mounted trigger, or restore focus manually
D-46	Notice off-screen on phone	UIX-089	Notice renders above the heading out of view → visible after the action	`workbench.tsx` notice placement	Use a toast or sticky notice
D-47	Colour contrast failures	UIX-024, UIX-027, UIX-092	Danger badge 4.15:1, setup footer about 1.9:1, `.doc-title-meta th`, unfocusable scroll regions → 4.5:1 and axe clean	`globals.css` tokens; `.table-scroll`	Darken the danger token, make the footer scrim opaque, add `tabindex` to scroll regions
D-48	Stale setup card in a second session	ONB-088	"Setup is already complete." stays on the card → open the workspace	`setup-wizard.tsx`	On that error, reload the workspace

Why: D-23 is S3 even though PRD-031 and PUR-007 are P1: nothing wrong is saved, only the message is unreadable. D-35 is S3 because the app is still usable by scrolling sideways.

S4

ID	TITLE	CASES	WHERE / FIX DIRECTION
D-49	Offline errors read "Failed to fetch"	AUTH-061, ONB-093	Login and branding upload `catch`: map `TypeError` to a "No internet connection" message
D-50	Forgot password with empty email sends a request	AUTH-032	`login-screen.tsx` `reset()`: check the email first
D-51	Login submit enabled before hydration	AUTH-083	`login-screen.tsx`: render disabled until mounted
D-52	Refreshing `/account/reset` after success shows the form again	AUTH-084	`reset-password.tsx`: show a completed or expired state
D-53	Reduced motion stops the provisioning ring	ONB-061	`globals.css:533` global `!important` rule beats `.provision-ring`; exempt the ring
D-54	`set_modules` silently drops unknown keys	ONB-077	`engine.ts:187`: refuse unknown keys
D-55	Follow-up accepted on a supplier	COL-053	`engine.ts:193`: require `type === "customer"`
D-56	Metric cards never stagger	NAV-037, UIX-053	`workbench.tsx:218` `Metrics`: set `style={{'--i':i}}`
D-57	Internal wording visible	NAV-043, PAY-094	"Revision" label in `settings-view.tsx:34`; "prototype rules" message at `engine.ts:139`
D-58	Long company name wraps in the switcher	NAV-082, UIX-083	Sidebar switcher: add `nowrap` + `text-overflow: ellipsis`
D-59	Escape does not close the phone drawer	NAV-054	Add a keydown handler on `.sidebar.mobile-open`
D-60	"Draft sales documents" link does not preset the filter	NAV-076	Pass `status=draft` when navigating to Sales
D-61	Phone search input is 15.2 px (iOS zooms on focus)	NAV-080	`.search-dialog .search-input` overrides the 16 px phone rule; raise its specificity
D-62	Tablet Overview overflows (799 px at 768)	UIX-003	Wrap the metric grid to two columns below about 900 px
D-63	Phone sheets keep 20 px bottom corners	CSH-051 (and PRN-062 [documented])	`globals.css:454` radius beats the `:636` phone rule; reorder or raise specificity
D-64	Sticky hover shadow after a tap	CSH-095	Gate the card hover in `@media (hover:hover)`
D-65	Negative bank balance not red	CSH-050	`cash-bank-view.tsx`: add a negative class
D-66	Payroll status badges share a colour	PAY-064	Four statuses use three colours; add a distinct tone
D-67	Trial balance columns left-aligned	ACC-091	Add the `num` class to the debit/credit/net cells
D-68	Set-quantity dialog lacks the current value	INV-063	`inventory-view.tsx`: show the value next to the quantity
D-69	Branding preview font differs from print	SET-069	Preview inherits Geist; apply the print font stack to the `.doc` preview
D-70	Features tab has no "N turned on" count	SET-075	Add the count to the Features header
D-71	Stray border radii (3/4/5/8/9 px)	UIX-062	Replace legacy radii with the 6/10/14/20 tokens
D-72	Default (blue) focus ring on scroll regions	UIX-029	Add the violet `:focus-visible` to `.table-scroll` and `.branding-preview-frame`
D-73	Empty states offer no next action	UIX-059	Add a primary action to the "No records yet." variants
D-74	Printed quantities lack thousands separators	PRN-016	`documents.ts:45`: format the quantity
D-75	Company address newlines lost in the print header	PRN-091	`.doc-identity span { white-space: pre-line }`
D-76	Document-chain rows are not links	PRN-056	`document-details.tsx`: make each row open its document

Found during the fix verification (15 October)

D-77 · S2 · An expiring session is refreshed but not saved, so members can be signed out after about an hour

Cases	AUTH-050 (was manual; now automated).
What happens	when the one-hour access token has expired, the first page render refreshes the session in a Server Component, which cannot write cookies, so the new tokens are dropped. If the member's next request comes more than 10 s later (Supabase's refresh-token reuse window), it reuses the spent refresh token, Supabase revokes the session and the member is signed out. If an API call happens within those 10 s it saves the refresh, so the failure depends on timing and the original browser pass did not catch it.
Expected	the refreshed session is always saved before the page renders.
Where	no session-refresh proxy (`src/proxy.ts`, Next.js 16's name for middleware); `src/lib/supabase/server.ts` silently ignores cookie writes from Server Components.
Fix	a session-refresh proxy that refreshes an expiring session once, before rendering, and writes the new cookies to both the rendering request and the browser (Supabase's recommended SSR pattern).

D-78 · S4 · Production CSS drops the standard backdrop-filter, so dialog backdrops and the top bar lose their blur in Chrome

Cases	SET-041 (the dialog backdrop is 3 px instead of 8 px on a production build); also the top bar's glass blur.
What happens	three rules wrote `backdrop-filter` before `-webkit-backdrop-filter`. The production CSS minifier treats the later prefixed declaration as overriding the standard one and drops the standard one, which Chrome needs, so an older 3 px rule wins. Development builds are not minified, so the agents' runs passed.
Expected	the same 8 px blur (12 px on the top bar) in production as in development.
Where	`src/app/globals.css` (top bar, dialog overlay, overlay + scrim rules).
Fix	write `-webkit-backdrop-filter` first and `backdrop-filter` last; a guard test (`tests/domain/fixes-css.test.ts`) keeps that order.

6. Behaviour to decide and case corrections

6.1 Not defects, but worth deciding

- **Tax default 18% (SAL-023, and SET-085 = D-27).** `lineInput` defaults an omitted `taxRate` to 18. Decide whether the default comes from Settings, and add a Settings field for it, since `save_settings` has no UI either (see D-09).
- **Sign-out ends every session (AUTH-019/049/090, ONB-073).** `auth.signOut()` uses global scope. Decide between global and local scope (`scope:'local'`).
- **Login pre-fills `owner@sahulaterp.com` (AUTH-001).** This is fine for the demo, but it reveals an account email on production.
- **Reset demo (SET-048, SEC-058).** The route always rebuilds the demo tenant, even when it is pressed from a non-demo workspace. Hide the button outside the demo company, or confirm which company will be reset.
- **Idempotent replay returns `recordId ""` (SEC-039).** This is recorded as accepted behaviour, but it causes D-17.
- **FX rate stored as entered (DAT-005)** conflicts with the PUR-095 expectation (D-05). Pick the FX precision before fixing D-05.
- **Cash & bank reconciliation compares the account total with itself (CSH-034)**, so it can never show a variance. This is a placeholder that looks like a control.
- **Security posture:** SameSite=Lax cookies with no Origin check and `?tenant=` accepted (SEC-048); no CSP (SEC-050); no request rate limiting beyond the password throttle (SEC-060).
- **Ledger gaps:** 2400 statutory payable is never settled in-app (PAY-081/082); bank transfers have no balance check (CSH-013); future dates are accepted everywhere (INV-017, DAT-063); a landed cost has no currency (IMP-045).
- **Snapshots:** branding is not snapshotted on documents (PRN-068), and party names are not snapshotted (PTY-086). Compare with the CLAUDE.md requirement for transaction snapshots.
- **Navigation:** no URL routing for modules or reports (RPT-090, NAV-060), so Back leaves the app.
- **Perf watch:** DAT-051 (10k documents, under 4 s) passed in the final run but measured 4.27 s in the stopped DAT shard. Treat it as borderline.

6.2 Behaviour recorded where a case asked to verify (221)

ID	CASE	ACTUAL BEHAVIOUR
AUTH-001	Open `/` signed out	email field is pre-filled with owner@sahulaterp.com
AUTH-002	Sign in with valid email and password	signs in at /?tenant=QA so it lands on that company; a bare / would open the first non-demo membership
AUTH-006	Empty password	also minLength=8
AUTH-010	200-character password	no account has a 200-char password; the field and the request carry all 200 characters and Supabase answers with the generic error
AUTH-011	SQL-ish email `' OR 1=1--@x.com`	the browser email validation blocks it before any request
AUTH-012	Script tag in email field	blocked by email validation, nothing rendered
AUTH-019	Sign out from the sidebar profile button	sign-out ends every session of the account
AUTH-022	Sign in with `?tenant=<own tenant>` in the URL	login keeps pathname+search via window.location.assign
AUTH-049	Sign out in one tab, act in another tab	sign-out ends every session of the account
AUTH-068	`member:create` for an existing email	verified from script source; not run against hosted
AUTH-073	Error message wording for wrong password	shows Supabase's own message "Invalid login credentials" verbatim
AUTH-076	Email 254 chars	passes browser validation, reaches Supabase and gets the generic error
AUTH-078	Emoji as password	no account has an emoji password; the field and request keep the emoji and Supabase answers with the generic error
AUTH-088	Sign in with an email that has a plus tag `a+qa@x.com`	no a+qa account exists; the address is accepted by the form and sent unchanged, Supabase answers generically
AUTH-090	Sign out while a command is in flight	sign-out ends every session of the account
ONB-005	Name filled, address empty	the wizard refuses client-side with "Enter the company name and address."; the API only refuses at complete_setup
ONB-012	Invalid email `abc`	input type=email blocks in the browser; API refuses "Invalid email address"
ONB-073	Sign out from the wizard	sign-out ends every session of the account
ONB-075	Steps saved via API out of order (`save_setup_step` 4 before 2)	any step 1-4 is accepted in any order
ONB-088	Owner finishes setup while a second member is on the card in another browser	simulated with the same owner in a second browser context; no second member account

ID	CASE	ACTUAL BEHAVIOUR
SET-029	Password field pasted with trailing newline	no trimming; refused as "Password incorrect."
SET-048	Reset demo on a non-demo company via API	the route only ever resets the demo tenant; non-members get 403
SET-072	Accent colour white `#ffffff`	no contrast validation; white headings are a design limitation
SET-079	Hide module while that module's view is open	an open tab moves to Overview on its next successful command
SET-083	Address empty in Settings	the form blocks it (textarea required); the API save_company accepts a blank address after setup
PRD-015	Price `1e3` typed	browser number input sends 1000; the API accepts "1e3" and stores it as typed, valued as 1000
PRD-019	Unit `1000 pcs` (user puts quantity in unit)	limitation; hint "pcs, box, kg…"
PRD-021	Category blank	new-product form defaults to "General"; a cleared category saves blank and a category plan pays its default rate
PRD-059	Export Unicode	plain UTF-8 without BOM, text/csv;charset=utf-8
PRD-070	501+ rows	limit is 2,000 rows per file; 2,001 refused by the API and by the dialog "Import at most 2,000 rows at a time."
PRD-074	Semicolon-delimited file	the parser auto-detects ";" so columns map correctly rather than failing
PRD-076	20 MB CSV	reading stops at the first row over 2,000, then "Import at most 2,000 rows at a time."
PTY-022	Email invalid	
PTY-046	Customer statement for Walk-in customer	
PTY-073	Count in Settings → Features (customers)	counts all
PTY-085	Credit limit exceeded on sales order	the check applies to sales invoices only
PTY-086	Customer renamed after invoices	no name snapshot on documents
PTY-087	Walk-in customer renamed by user	lookup is by name
INV-015	Set quantity 999,999,999	the resulting value 1,499,999,923,500 exceeds one trillion; the below-one-trillion rule applies to inputs only
INV-017	Date in the future	accepted (no future-date guard)
INV-032	Salesperson opens Inventory	Inventory is not in the Salesperson sidebar; the stock data is still sent (for selling) and the view has no edit/transfer buttons
INV-054	Archive a warehouse with stock	there is no warehouse archive; set_archived accepts only party/item
INV-076	Transfer dialog warehouse selects exclude archived	warehouses cannot be archived, so there is nothing to exclude
INV-077	Transfer multiple lines	a transfer moves one product; each is guarded on its own and an over-quantity transfer changes nothing
SAL-023	Tax 0 and blank	a line sent without taxRate takes the company tax rate in Settings, or 0 when it is blank
SAL-032	Salesperson submits an invoice	role gate refuses first with "Your role does not permit this action."
SAL-061	Due date before date	accepted, no ordering check
SAL-080	Escape closes editor with unsaved changes	closes immediately, no confirmation, typed data discarded
SAL-090	Delivery note print	quantities AND rates/amounts/totals are shown
SAL-093	Submit a document whose product was archived after drafting	create refuses archived products but submit of an existing draft still succeeds
PUR-004	New supplier name → "Save supplier?" Yes	Importer class, 30-day default terms
PUR-039	Payment by cheque (outgoing)	recorded as status received with no journal; follows the same deposit/clear state machine, posting on clear
IMP-023	All weights 0, basis weight	allocation refused "Allocation needs positive weights."; no fallback
IMP-034	Shipment status flow in_transit → customs → received → costed	engine has no in_transit/customs commands; new shipments start "received", adding a cost sets "received", allocation sets "costed"
IMP-041	Deposit later refunded	no refund command; a manual journal Dr bank / Cr 1400 clears it
IMP-045	Cost in USD?	a cost has no currency; on a USD GRN the amount is posted as PKR as entered
IMP-049	Two shipments for the same GRN	allowed; each allocates its own costs

ID	CASE	ACTUAL BEHAVIOUR
IMP-050	Delete cost before allocation	not supported; no delete command exists
IMP-051	Edit cost after allocation	no edit command; allocated costs are immutable
IMP-059	Allocation then supplier return	return removes stock at the bill line cost (excl. landed cost); landed cost stays on remaining units; payable reduced by bill price only
IMP-064	Turn Imports on later	nothing is provisioned; deposit/expense accounts are part of the fixed chart
IMP-085	Recoverable tax appears in tax summary/reports	no separate tax summary; shown as 1300 Recoverable tax on the balance sheet and trial balance
IMP-092	Turn off Inventory with Imports on	engine refuses unless Imports is also turned off ("Imports & costing cannot stay on without Inventory."); dropping both hides both
IMP-097	Export shipments CSV (if present)	there is no shipment CSV export
COL-026	Bounce from cleared	recovery is recorded only via payroll when commission was already paid (see COL-071)
COL-035	Journal on cheque receipt	no cheques-in-hand account
COL-046	Salesperson records receipt	refused, "Your role does not permit this action."
COL-059	Statement shows cheque only when cleared	received/deposited cheques are not shown as pending lines
COL-060	Receipt date before invoice date	allowed; aging unaffected, no crash
COL-061	Receipt in future date	allowed when the month is not locked
COL-069	Collections hidden module	with Collections off no customer receipt can be recorded
COL-079	Deposit without account id	API accepts it; clearing then posts to 1000 "Bank & cash (legacy)"
COL-080	Deposit into cash account type	allowed by the engine; UI lists only bank accounts
COL-087	Follow-up on archived customer	allowed
COL-091	Clear cheque dated earlier than deposit	allowed; journal and statement use the clear date
COL-094	Receipt row actions by state	received → Deposit/Bounced, deposited → Cleared/Bounced; cleared and bounced cheques leave "Cheques in hand" and keep only Print, so a cleared cheque cannot be bounced from the UI
CSH-009	Add accounts until limit	cap is 99 accounts, codes 1001–1099
CSH-013	Transfer more than balance	no balance check; source goes negative
CSH-025	Activity filter by date	Cash & bank activity has no date filter; Reports → General ledger filters an account by date
CSH-034	Cash/bank control reconciliation	the reconciliation row compares the account total with itself, so it can never show a variance
CSH-055	Date defaults today (Asia/Karachi)	no engine default
CSH-063	Account with 10,000 lines	no pagination; card shows latest 50 movements
CSH-064	Export activity CSV (if present)	not present in Cash & bank; use Reports → General ledger export
CSH-065	Search finds account by name	not present; search covers documents, parties and items only
CSH-066	Account details text shows on card	bank cards show details; cash cards show "Cash"
CSH-078	Memo truncation with tooltip	the memo wraps in full; no truncation or tooltip
CSH-085	Account select order	creation order everywhere, not bank-first or alphabetical
CSH-087	Account names with Urdu	id falls back to "record" slug; code assigned normally
COM-011	Category plan: Lighting = 2.5	unlisted categories fall back to the plan rate
COM-014	Tiered plan 0 = 2, 500000 = 3	marginal tiers on each line's own net base, not cumulative across invoices
COM-015	Target and multiplier	once the salesperson's month-to-date base incl. this line reaches the target, that line's commission is multiplied
COM-052	Invoice with inactive employee via API	allowed; commission accrues
COM-057	Export employees	export columns are the same for all roles, values come from the projection
COM-061	Commission with Collections hidden	refused, so cash releases always have a collections path
COM-062	Commissions hidden then invoice submitted	accrual is not gated by the module
COM-066	Journal on payroll pay	2200 is cleared at payroll approval; payment settles 2300

ID	CASE	ACTUAL BEHAVIOUR
COM-069	Rate 0	a zero entitlement row is created and no journal is posted
COM-072	Tier threshold equal to base	the amount up to the threshold earns the lower tier; only the excess earns the next tier
COM-080	Sales analysis by salesperson includes commission	not present; rows carry invoices, quantity, net, returns only
COM-084	Plan form shows only fields for its type	every type shows all fields — category, class, tier rates, target and multiplier
COM-087	Search finds employee	not present; search covers documents, parties and items only
COM-094	Employee deactivated with unpaid commission	payroll skips inactive employees, so it is not paid until reactivated
PAY-010	Gross = salary + allowance (attendance-prorated per rule)	basic = salary × attendance ÷ 30; allowance is not prorated
PAY-011	Attendance 0	basic 0, allowance still paid; with no allowance the employee EOBI makes deductions exceed earnings and the whole run is refused
PAY-026	Pay posts: Dr salary expense / Dr employer EOBI / Cr payroll payable / Cr statutory payable / commission payable cleared	expense posts at approval, payment credits legacy 1000
PAY-033	Payroll print/payslip (if present)	not present; printable kinds are sales, purchase and receipt documents only
PAY-041	Turn Payroll on later	no account provisioning needed; chart is fixed
PAY-050	Run for a future month	allowed
PAY-053	Reconciliation: payroll payable	no payroll row in the Control reconciliation
PAY-076	Export payroll CSV (if present)	not present in the Payroll view
PAY-077	Search finds payroll run	not present; search covers documents, parties and items only
PAY-080	P&L shows salary and employer EOBI	employer EOBI is inside 5200 Salary expense, no separate line
PAY-081	Balance sheet shows payables until settled	2400 is never settled in-app
PAY-082	Settle payroll payable via Cash & bank expense/transfer	payroll pay settles 2300 automatically; 2400 needs a manual journal because record_expense only allows 5100/5200/5300
PAY-083	Attendance 30 default	import and the form default to 30; the API requires attendance
PAY-085	Reports: payroll summary (if present)	not present; payroll appears only through P&L / ledger accounts
PAY-089	Line commission tooltip lists invoices	not present — no tooltip; a run opens its per-employee amounts (PAY-063), not the invoices behind the commission
ACC-010	Lines with zero on both sides	the command still reports "Balanced journal posted."
ACC-012	Memo empty	an empty string is allowed; omitting memo fails validation
ACC-048	Manual journal to control accounts (1100/2000/1200)	allowed; reconciliation then shows a variance
ACC-055	Journal print/export	not present in the Accounting view; Reports offers General ledger / Trial balance CSV
ACC-056	Rounding: 3 lines of 33.3333 vs 100	manual journals are not auto-allocated
ACC-087	`commit_workspace` rejects unbalanced?	the database rejects it ("not balanced") and keeps the old revision
RPT-014	Sales analysis by salesperson	net and returns per person present; COGS, margin and commission not present
RPT-016	Sales analysis by item	margin not present
RPT-020	Aged payables total = payable control	aging excludes unbilled landed-cost charges; aging + landed-cost payable = control
RPT-024	Profit & loss for a month	no separate gross-profit line
RPT-037	Export empty report	the Export button is disabled when the table has no rows
RPT-055	Sales analysis margin after landed cost	not present; COGS incl. landed cost is visible in P&L 5000
RPT-061	Balance sheet includes cheques in hand (if asset)	an uncleared cheque posts nothing, so it is not an asset until cleared
RPT-063	Trial balance excludes zero accounts?	no option to show them
RPT-065	Reconciliation after company reset	verified on a fresh company; the reset script is hosted
RPT-066	Report parameters persist while switching tabs	shared parameters persist across reports; leaving Reports resets them; no crash
RPT-070	Customer statement for customer with no activity	opening and closing 0 with no lines; the table shows an "Opening balance" row rather than "No activity"

ID	CASE	ACTUAL BEHAVIOUR
RPT-078	Negative numbers formatting	"Rs -1,234.5" with a leading hyphen-minus
RPT-079	Totals row sticky/bold	bold with a heavy top border; not sticky
RPT-087	Direct API export endpoint (if any) auth	not present; exports are generated in the browser
RPT-090	Deep link to a report (if routed)	reports are not routed — /reports and ?report= open the app at Overview
RPT-092	Stock valuation excludes zero-stock items?	always omitted, no toggle
RPT-093	Aged payables for USD bills	no currency column
RPT-097	Report refresh after a new command in another tab	the open tab does not refresh by itself
RPT-099	Reports accessible screen-reader table headers	header cells are <th> in <thead> without an explicit scope attribute
PRN-010	Terms line	walk-in invoices show the shared walk-in account terms, here "0 days"
PRN-014	Unit "1000 pcs"	
PRN-023	Quotation print	Due row still printed from dueDate
PRN-025	Delivery note print	prices and amounts are printed too
PRN-028	Supplier bill print	Due is the date entered on the bill, not recomputed from supplier terms
PRN-032	Customer statement print	printed from Reports → statement via browser print; no /print/statement route
PRN-037	Logo URL signed and short-lived	600 s expiry; expired-link failure needs hosted storage
PRN-050	Emoji in notes	glyph rendering needs a browser
PRN-058	Details: returns list	a return appears as its credit note in "Document chain", the line shows "1 returned" and totals show "Returns / credits"
PRN-063	Print URL with wrong tenant param but your own doc	a non-member tenant falls back to the first membership
PRN-064	Print URL without tenant param	memberships[0
PRN-067	Print in a company still in setup	print is allowed; there are no documents so any id is not found
PRN-068	Branding changed after invoice	branding is not snapshotted
PRN-070	Amount in words (if present)	not present on the template
PRN-074	Tax column `0%` vs blank	
PRN-075	Save as PDF filename suggestion	Chromium names the PDF after the tab title, which stays "SahulatERP · Your business, connected"; PrintActions' "Sales invoice <number>" title is not applied
PRN-079	Back from print returns to app state	Print opens a new tab; closing it leaves the app tab exactly as it was
PRN-080	Table header repeats on each printed page	repetition itself needs a browser
PRN-083	Print via keyboard Ctrl/Cmd+P	headless Chromium cannot show the native dialog; the page leaves the shortcut to the browser (keydown not prevented) and the browser prints the same @media print output the button uses
PRN-084	Print a document while its module is hidden	allowed; document kept
PRN-085	Statement print for walk-in customer	all walk-in documents are grouped under the one shared account
PRN-090	Invoice number barcode/QR (if present)	not present
PRN-093	Letterhead + NTN	NTN is omitted with the letterhead, consistently
PRN-100	End to end: branded invoice with logo, NTN, footer, walk-in name, partial payment and return prints correctly on A4	A4 layout needs a browser
NAV-008	Workspace switcher lists memberships with demo tag	current company carries a check icon labelled "Current company"; there is no separate highlight colour
NAV-009	Switch company	target navigation intercepted and verified; the other company is not opened per the isolation rule
NAV-010	Switcher with one company	the owner account belongs to 6 companies, so a one-company menu cannot be produced without creating a user; verified the trigger shows the current company and it appears exactly once in the menu
NAV-022	Search empty string	placeholder "Invoice number, customer, SKU…" and the description; the results area stays empty, also for spaces only

ID	CASE	ACTUAL BEHAVIOUR
NAV-023	Search 2 chars	results appear from the first character with no "type more" message; "Al" returns the first 8 documents (their type text "sales invoice" matches), so the Ali Traders customer is pushed past the 8-result cap
NAV-030	Bell menu lists items grouped; click goes to module	one row per queue labelled "{count} · {Module}" rather than grouped headings; queues are commission awaiting approval, unallocated shipment costs, overdue supplier bills (D-42), open customer invoices, cheques due, follow-ups due, draft sales
NAV-057	Tabbed modules (Sales: Documents/Customers; Inventory: Stock/Products/Warehouses)	tabs expose role=tablist/tab and aria-selected; no role=tabpanel/aria-controls and no arrow-key movement between tabs
NAV-060	Browser back/forward	module switches add no history entries; Back leaves the app for the previous page and Forward reloads the same company on Overview
NAV-063	Preview as role chip and Exit	non-Owner members could not be signed in here; demo vs non-demo verified
NAV-069	Dialog overlay click	the document editor also closes on an overlay click, discarding typed lines
NAV-083	Many companies (10) in switcher	with 10 entries the menu fits within 1440×900 and 1366×768 without scrolling; the menu has no max-height, so it does not scroll itself
NAV-090	Breadcrumb "Workspace" not a link	
NAV-097	Offline then command	the notice reads the browser text "Failed to fetch"
SEC-005	RLS: query `workspace_snapshots` with anon key and user JWT for other tenant	an Owner/Accountant/Auditor can read their own tenant's snapshot; a salesperson none
SEC-010	Service-role key absent from client bundle	no build output scanned, source only
SEC-011	`NEXT_PUBLIC_*` contains only URL and publishable key	.env.example also has NEXT_PUBLIC_APP_URL
SEC-044	Payload 5 MB	no 413 at app level; field limits reject it
SEC-047	GET /api/workspace	signed-in GET returns the role-scoped workspace
SEC-048	CSRF: cross-site POST with cookies	session cookies are SameSite=Lax (@supabase/ssr default); the route has no Origin check and also accepts ?tenant= in the URL
SEC-050	Security headers (X-Frame-Options/CSP)	X-Content-Type-Options, Referrer-Policy, X-Frame-Options DENY, Permissions-Policy on all routes; no CSP; HSTS left to the host
SEC-051	XSS via every free-text field (name, notes, memo, footer, reason)	list/dialog rendering needs a browser
SEC-058	`/api/demo-reset` on non-demo	route always targets the demo tenant
SEC-060	Rate limiting on commands (200/min)	none in the app; only the 5-per-15-min password throttle exists
SEC-080	Enumerate ids by guessing (uuid)	
SEC-091	Unicode normalisation attack on names (duplicate check)	names are compared with trim + toLowerCase only; NFC "Café" and NFD "Café" are both accepted
SEC-095	Log review: no PII in logs	only "Empty workspace command body" (method/length/type), database rejection messages and unexpected server failures (the thrown error, never the request body) are logged
UIX-016	Hover styles not stuck after tap	colour-only :hover rules on nav and buttons are not gated
UIX-031	Skip to content link (if present)	not present
UIX-047	Animations ≤ 320ms UI, ease-out	spinners, skeleton pulse, provisioning ring and the 800 ms setup reveal are longer by design
UIX-049	No layout-animating properties (width/height) except accordions	only .setup-progress animates width
UIX-054	Hover lift only pointer:fine	the nav-icon hover scale is not pointer-gated
UIX-057	Money format `Rs 1,234` consistent	formatter checked; every screen needs a browser pass
UIX-061	No raw hex in components (tokens only)	only the branding accent swatch palette in branding-form.tsx
UIX-065	Gradient only on brand mark, welcome strip border, LIVE, final setup button, provisioning ring/progress	also the welcome-strip icon tile
UIX-079	Number inputs show numeric keyboard	document editor and record forms checked in source only
UIX-080	Select elements styled consistently	filter-bar selects are a compact 12.64 px / 41 px size; form selects are 14 px / 42 px; radius, border, background, colour and font are identical everywhere
UIX-084	Urdu text rendering	Geist has no Arabic script; Chromium falls back to a system Arabic font

ID	CASE	ACTUAL BEHAVIOUR
DAT-013	10 concurrent invoice creations	requests are serialised by the revision check
DAT-026	Snapshot with unknown extra keys	preserved, except the retired fbr and bankLines keys which are dropped
DAT-027	Snapshot schema_version bump path	schemaVersion stays 1; additive fields are defaulted by decodeWorkspace; no version switch exists
DAT-032	Audit includes failed commands?	no
DAT-039	Numbering width 4 then 10,000th doc	a plain string sort then puts …-10000 before …-9999
DAT-042	Item rename	
DAT-048	Demo reset restores exact seed (hash)	content is identical; ids and audit timestamps are regenerated, so a raw hash differs
DAT-049	Snapshot size growth 10k documents	extrapolated from 200 invoices
DAT-050	Command latency with 10k docs	engine only, excluding network/DB
DAT-051	Page load with 10k docs	9,9xx extra documents are drafts cloned from an engine-built draft (no postings, so the ledger stays balanced); a 10k-document company cannot be built command-by-command in test time
DAT-057	Walk-in account creation then document fails	the walk-in account remains; acceptable
DAT-063	Clock skew client vs server	future dates are accepted
DAT-074	Unicode normalisation of names	not normalised; NFC and NFD forms are distinct
DAT-081	Snapshot JSON stable key order (diffability)	not normalised; insertion order from the engine
DAT-088	Playwright suites independent of order	re-runs this pack's UI file and then its print file, each alone in a child Playwright run (the reverse of the default 16 → 19 order), and compares every outcome with its tag: defect-tagged tests fail, manual-tagged tests skip, the rest pass
DAT-089	Playwright global warm-up prevents compile 500s	the server under test is a production build, so there is no on-demand compile to provoke; the warm-up is wired in the config and every route it touches answers below 500
DAT-091	No retry on 4xx	a 4xx whose body is not JSON is retried once
DAT-094	Stale tab commits from old revision	the server re-reads the latest snapshot on every POST, so the command applies on top without a conflict

6.3 Case corrections (104)

These cases guessed a harmless detail wrong, such as an account code, a number format or exact wording. The test asserts what the product actually does, and the pack should be updated to match.

ID	CASE	WHAT IS ACTUALLY TRUE
AUTH-063	Inspect network: password sent only over HTTPS to Supabase	sign-in runs on the server (D-31), so the browser posts the password once to the app's own /auth/signin route (HTTPS in production) and never calls Supabase itself
ONB-050	Provisioned accounts	the chart is a fixed list (accountNames) present for every company regardless of modules; nothing is provisioned per module
ONB-051	Provisioned number series	series are derived from existing documents on first use, not provisioned records
ONB-059	Press "Create my workspace" twice quickly	a replay returns the original recordId and message (D-17)
ONB-068	Card on iPad portrait	the Documents step stacks the preview under the form below 1000 px, so iPad portrait shows one column
ONB-086	Audit history after setup	actor is the user id, actorName the display name (D-21)
ONB-090	Address with 2,000 characters	the address limit is 500 characters (form maxLength 500, API max 500)
ONB-092	Footer containing only spaces	stored as typed (not trimmed); prints an empty-looking footer paragraph
SET-001	Open Settings	D-09 adds a "Payroll & tax" tab after Company & documents
SET-014	Salesperson saves company name	after setup company details are Owner/Accountant only (D-08)
SET-024	Try to turn off Sales via API but keep Commissions	message lists modules in catalogue order: "Collections & PDCs, Commissions cannot stay on without Sales."
SET-043	Access tab: company name, tax id, revision	the internal revision number is no longer shown (NAV-043, D-57)
SET-050	Audit history tab	actor is the user id, actorName the display name (D-21)
SET-058	Settings reachable for every role	only Owner, Accountant and Auditor see Settings; other roles have no Settings entry

ID	CASE	WHAT IS ACTUALLY TRUE
SET-059	Keyboard navigate tabs	five tabs since D-09 added Payroll & tax
SET-068	Branding preview uses latest posted invoice if any, else sample	it uses the first submitted invoice in the list, not the latest
SET-081	Company & documents save as Recovery Officer	refused once setup is complete; Owner/Accountant only (D-08)
SET-086	Numbering prefix in settings	settings.numbering ("DP" for a new company) is stored but not used; documents use fixed kind prefixes like INV-YYYY-0001
PRD-002	Empty SKU	API error is the min-length validation (route shows "Check the highlighted information."); "SKU is required" is the CSV import message
PRD-084	Import idempotency: retry same key	a replay returns the original recordId and message (D-17)
PTY-023	Phone `0300-1234567`	party phone is not printed on documents (print shows name, city, email, NTN)
PTY-060	Import duplicate name in file	message is "X appears more than once in the file" without the "customer" prefix
PTY-093	`save_party` for another tenant's id	the id is treated as a new record in this tenant; no other tenant's data is read or changed
INV-008	Set quantity without reason	set_stock_quantity returns the min-length validation (form field is required); "Adjustment reason is required." is the stock_adjust message
INV-046	Overview attention: low stock queue	the Overview attention list has no low-stock entry; low stock shows only as Inventory badges/filter
INV-060	Movement history order	the report is chronological; Item details shows the newest 20 movements first with no running quantity
INV-069	Idempotent retry of set_stock_quantity	a replay returns the original recordId and message (D-17)
INV-072	Stock tab totals row	the Stock tab has no totals row; the total is in Reports → Stock valuation
INV-074	Archived product with stock in Stock tab	shown, but without an "archived" mark
INV-086	2,000 products × 3 warehouses	each table draws its first 100 rows with "Show 100 more"; search and filters reach the rest
SAL-050	Submit twice (double click / retry)	a replay returns the original recordId and message (D-17)
SAL-099	Invoice for a customer in another branch (branch-limited member)	message is "This warehouse is outside your permitted branches."
PUR-018	GRN submit journal	credit goes to 2010 Goods received, not billed
PUR-031	Allocation exceeds bill outstanding	message is "Invalid invoice allocation."
PUR-034	Allocate to a bill of another supplier	message is "Invalid invoice allocation."
PUR-035	Allocate to a draft bill	message is "Invalid invoice allocation."
PUR-044	Supplier statement	GRNs are not listed either
PUR-061	Input tax on bill with tax 18	input tax account is 1300 Recoverable tax
PUR-076	Bill without GRN (direct bill)	a direct bill DOES move stock in and debits 1200
PUR-080	Idempotent retry of submit GRN	a replay returns the original recordId and message (D-17)
PUR-081	Idempotent retry of payment	a replay returns the original recordId and message (D-17)
IMP-037	Customs/GD lookup	withdrawn — real customs lookups are out of scope (test plan §2) and simulated lookups were removed from the product; the GD number is entered by hand
IMP-061	Idempotent allocate retry	a replay returns the original recordId and message (D-17)
IMP-066	Amount 999,999,999,999	accepted (below one trillion); 1,000,000,000,000 is refused
IMP-069	Origin/port blank	defaults apply only when the fields are omitted; blank strings are stored blank
IMP-073	Sales analysis margin after allocation	Sales analysis has no margin column; the overview margin (summary) reflects landed cost
IMP-086	Expense classification appears in P&L under clearing/import expenses	posts to 5300 "Operating expense", not a separate clearing/import expense line
COL-005	Allocation exceeds invoice outstanding	message is "Invalid invoice allocation."
COL-006	Allocation to another customer's invoice	message is "Invalid invoice allocation."
COL-007	Allocation to a draft invoice	message is "Invalid invoice allocation."

ID	CASE	WHAT IS ACTUALLY TRUE
COL-038	Idempotent retry of create_receipt	a replay returns the original recordId and message (D-17)
COL-039	Idempotent retry of clear	a replay returns the original recordId and message (D-17)
COL-044	Receipt numbering RCT-? per year	REC-0001, REC-0002… one global series without a year, shared with supplier payments
COL-084	5,000 receipts	the receipts table draws the newest 100 with "Show 100 more"; the filters reach the rest
COL-100	End to end: invoice 10,000 → cash 4,000 → cheque 6,000 deposit → clear → bounce → re-receive cash; statement and commission correct	the statement also lists the bounced cheque and its reversal (D-25)
CSH-037	Idempotent transfer retry	a replay returns the original recordId and message (D-17)
CSH-046	Amount 999,999,999,999	accepted (limit is below one trillion); 1,000,000,000,000 is refused
CSH-048	Memo with newline	surrounding whitespace is trimmed; an inner newline is kept as typed
CSH-094	Mobile card tap opens activity	summary cards are not tappable; the account name in the Accounts list opens the activity
COM-028	Invariant earned ≥ released ≥ paid	paid may exceed released after a bounce until payroll recovers it
COM-055	Import duplicate employee	message is "Hamza Khan appears more than once in the file" without the word "employee"
COM-081	Entitlement badges earned/released/approved	states read unreleased / pending (released, awaiting approval) / approved / recoverable
COM-090	Idempotent approve retry	a replay returns the original recordId and message (D-17)
COM-091	Approve then invoice bounce	approved resets to false when the release changes
PAY-004	Create payroll 2026-10	the message is "Payroll calculated." (D-57)
PAY-043	Employee with only commission	net = commission − income tax − employee EOBI
PAY-048	Numbering per year	PAY-YYYY-MM (one run per month), not PAY-2026-0001
PAY-054	Cancel/delete draft run	cancel_payroll cancels a draft or reviewed run; approved and paid runs are refused (D-10)
PAY-065	Audit entries for each transition	the create message is "Payroll calculated." (D-57)
PAY-066	Idempotent pay retry	a replay returns the original recordId and message (D-17)
ACC-008	Negative amount	rejected at validation with "Amount cannot be negative."
ACC-014	Reverse a manual journal	memo "Reversal · JV-00001"; message is the generic "Changes saved."
ACC-033	Journal numbering sequential	JV-00001 style, not J-2026-0001
ACC-054	Filter by date range	the date range lives in Reports → General ledger; Accounting lists the latest 8
ACC-090	Journal detail on phone	no separate journal detail screen; the Recent posted journals table is the journal view
RPT-038	Date pickers default to current month	range defaults to 1 January of the current year → today (year to date); as-at defaults to today
RPT-046	Report link from Overview "Needs attention"	rows open the module queue, not a report
RPT-073	Sales analysis "no salesperson" bucket	labelled "Unassigned"
RPT-076	Report headings and currency label PKR	amounts are shown with "Rs", not "PKR"
PRN-002	Logo uploaded	logo box is 22mm (≈83px) square with object-fit: contain
PRN-043	Fonts: Geist loads in print; fallback OK offline	the print template uses Arial/Helvetica with "Noto Naskh Arabic" fallback, not Geist
PRN-053	Logo transparent PNG on accent background	the logo sits on the white document header, not on an accent background
PRN-073	Discount column shows `10%` only when non-zero	"0%" is printed for zero discounts as well, not only when non-zero
PRN-078	Print page title = document number	title is "<Kind> <number>", e.g. "Sales invoice INV-…", set client-side by PrintActions
PRN-081	Page margins 15–20 mm	@page margins are 14mm sides/top and 16mm bottom, A4
NAV-015	Search "INV-2026"	since D-39 the journals whose memo names an INV-2026 invoice also match; the invoices are listed first

ID	CASE	WHAT IS ACTUALLY TRUE
NAV-016	Search customer name	since D-39 a journal whose memo names the customer (an expense "for the Metro Home Stores order") is listed too
NAV-019	Search employee	search covers documents, customers, suppliers and products only, as its description says; employees are never returned for any role, so salaries cannot leak
NAV-031	Attention: draft sales to submit, cheques due, low stock, follow-ups due, unallocated shipments, released commissions, overdue invoices/bills	queues are commission awaiting approval, unallocated shipment costs, overdue supplier bills (D-42, for roles that pay suppliers), open customer invoices, cheques due, follow-ups due and draft sales; there is no low-stock queue
NAV-038	Sales & collections chart last 6 months	weekly totals up to 12 weeks ending at the latest activity, not 6 months; bars violet (accent) and cyan (accent-2) with legend
NAV-061	Reload keeps company (via cookie) but returns to Overview	the company is kept by the ?tenant= query that stays in the URL, not by a cookie
NAV-064	Footer "SAHULAT ERP · Made for the way you do business · PKR · Asia/Karachi"	reads "SAHULAT ERP Made for the way you do business." and "PKR · Asia/Karachi" without the extra dots
SEC-002	POST with missing `x-tenant-id`	403 TENANT_REQUIRED, not 400
SEC-036	Idempotency: same key twice	a replay returns the original recordId and message (D-17)
SEC-039	Same key, different payload	treated as a replay — unchanged workspace and the first call's recordId and message (D-17)
SEC-041	Revision conflict: two clients commit from same revision	the client does not auto-retry; it shows "Another change was saved first. Refresh and try again."
SEC-046	Content-Type text/plain	415 Unsupported Media Type, not 400
SEC-084	`qa:tenant` only touches QA tenant id	QA_TENANT_ID may pick one of six allow-listed 3333… tenants for parallel runs; anything else throws
SEC-092	Command replay from old revision	a replay returns the original recordId and message (D-17)
SEC-093	Timeout mid-commit	a replay returns the original recordId and message (D-17)
DAT-003	Allocation of 100 across 3 lines	33.3333 / 33.3333 / 33.3334 — the last line takes the remainder
DAT-014	Concurrent receipt and return on same invoice	a receipt above the outstanding is refused; a return after full payment is allowed and leaves a customer credit (negative outstanding) by design
DAT-049	Snapshot size growth 10k documents	the replay history is capped (D-17), so it is added once at its full size rather than extrapolated per invoice
DAT-090	Client retries once on ≥500 with same key	postCommand retries once with the same body only when the response is not JSON or a 5xx without a message; a 5xx with a message is not retried

7. Manual-only cases (56)

These cases cannot be automated in this environment. They are the checklist for a hands-on session on real devices before the first customer goes live.

ID	P	CASE	WHY MANUAL
AUTH-031	P1	"Forgot your password?" with a valid email	reset email delivery with link to /auth/callback?next=/account/reset (redirectTo verified in source)
AUTH-034	P2	Forgot password twice quickly	two quick reset requests: hosted Supabase rate limit surfaced cleanly
AUTH-036	P1	Set new password of 8 chars	Set a new 8-char password through the emailed reset link, sign in with it, old one fails
AUTH-039	P2	New password 72+ chars	72+ char new password: hosted GoTrue limit, never silently truncated
AUTH-040	P2	New password equal to old password	new password equal to old: hosted Supabase policy
AUTH-042	P2	Reuse the reset link after success	Reusing the emailed reset link after success shows the expired state
AUTH-043	P2	Reset link opened in a different browser	reset link opened in a different browser
AUTH-051	P2	Two accounts in two browsers simultaneously	Two accounts in two browsers have independent sessions
AUTH-059	P2	Password manager autofill	password-manager autofill fills both fields
AUTH-066	P1	Reset-password flow for a user, then sign in as another user in same browser	Reset-password flow for one user then sign-in as another in the same browser: no leakage
AUTH-067	P2	Member created by `npm run member:create` with MEMBER_DEMO=1	member:create with MEMBER_DEMO=1 against hosted: sees own and demo company
AUTH-070	P2	`company:reset` for a member	company:reset against hosted: next sign-in shows setup card
AUTH-079	P2	20 failed logins in a minute	20 failed logins/minute: hosted Supabase rate limit surfaced
AUTH-085	P2	Reset page with another user's recovery token	reset page with another user's recovery token changes only that user
AUTH-086	P3	Browser with cookies disabled	cookies disabled: clear failure, no loop
AUTH-097	P2	Sign in, change password elsewhere, continue	password changed elsewhere: session continues until refresh fails
AUTH-100	P2	Full round trip: sign up by script → sign in → setup → sign out → forgot → reset → sign in	full round trip script sign-up → sign in → setup → sign out → forgot → reset → sign in
ONB-097	P2	Company reset by script, user already signed in	company reset by script while signed in; next navigation shows the setup card (needs hosted Supabase)
PTY-090	P2	Suggestions on iOS Safari	Suggestions on iOS Safari: datalist works or free text still saves
SAL-066	P2	Two users create invoices simultaneously	two users create invoices at once: needs real Supabase commits (code review: api/workspace/route.ts:59 returns 409 "Another change was saved first. Refresh and try again." with no
CSH-086	P2	Balance after company reset	balances after company reset are 0 — reset runs the hosted company:reset script; fresh-company zero state is covered by CSH-002
RPT-098	P2	CSV opens in Excel with correct columns	exported CSV opens in Excel with correct columns
PRN-054	P2	Print on phone (iOS Share → Print)	iPhone Share → Print layout fits without clipping
PRN-099	P2	Print page in Safari	print page in Safari matches Chrome
NAV-070	P2	First load TTI < 3 s on 4G	first load TTI < 3 s on 4G (Lighthouse)
NAV-075	P2	Hover motion only with mouse	touch device: no stuck hover after tap
NAV-095	P2	Idle for 1 hour then act	idle 1 hour then act: works or clean re-login
SEC-056	P2	Logo signed URL reuse after expiry	logo signed URL reused after its 600 s expiry fails (hosted Storage)
SEC-061	P2	Session fixation: sign in doesn't reuse pre-login session id	session fixation: sign-in issues a new session (hosted Supabase Auth)
SEC-062	P2	Logout invalidates refresh token	logout invalidates the refresh token (hosted Supabase Auth)
SEC-063	P2	Password reset token single-use	password reset token is single-use (hosted Supabase Auth)
SEC-069	P2	Dependency audit `npm audit`	npm audit: no high/critical (needs the npm registry)
SEC-085	P2	Vercel env has no service key exposed as NEXT_PUBLIC	Vercel env exposes no service key as NEXT_PUBLIC_*

ID	P	CASE	WHY MANUAL
SEC-086	P2	HTTPS only; HSTS	HTTPS only with HSTS on the deployed host
SEC-087	P2	Cookie secure flags in prod	production cookies carry Secure
SEC-096	P2	Backup/restore of snapshot table	backup/restore of the production snapshot table, then rebuild the projection
SEC-097	P2	Penetration smoke with OWASP ZAP baseline	OWASP ZAP baseline scan: no high alerts
SEC-098	P2	Auth brute force	auth brute force hits hosted Supabase limits
UIX-009	P2	Sheet content scrolls with overscroll contained	sheet content scrolls with overscroll contained (no rubber-band) on iOS
UIX-011	P2	Keyboard open on phone with sheet	phone keyboard open with sheet keeps actions reachable
UIX-019	P2	Landscape phone	landscape phone usable
UIX-043	P2	Screen reader reads setup steps and progress	screen reader announces setup steps and progress
UIX-072	P2	Windows high-contrast mode	Windows high-contrast mode keeps borders visible
UIX-073	P2	Safari desktop rendering	Safari desktop matches Chrome
UIX-074	P2	Firefox rendering	Firefox matches Chrome
UIX-075	P2	iOS Safari bottom bar overlap	iOS Safari bottom bar does not cover sticky actions
UIX-076	P2	Android Chrome keyboard resize	Android Chrome keyboard resizes the layout
UIX-077	P2	Datalist on iOS	datalist on iOS offers suggestions or free text
UIX-078	P2	Date input on iOS	date input on iOS opens the native picker
UIX-090	P2	Lighthouse accessibility ≥ 95 on login, overview, sales	Lighthouse accessibility ≥ 95 on login, overview, sales
UIX-091	P2	Lighthouse performance ≥ 80 mobile	Lighthouse mobile performance ≥ 80
UIX-094	P2	Voice control names match visible labels	voice control names match visible labels
UIX-100	P1	Full tour on iPhone hardware	full tour on iPhone hardware
DAT-023	P2	Migration dry-run on hosted copy	migration dry-run on a hosted copy
DAT-062	P2	Supabase auth slow	slow hosted Supabase auth: UI waits, no duplicate
DAT-098	P2	Vercel deploy rollback	Vercel deploy rollback: previous build reads current snapshots

8. How to reproduce

STEP	COMMAND	RESULT
Engine pass (all 20 areas)	`npm run test:qa`	Writes `reports/qa-run/vitest.json`. Open defects are failing tests tagged [defect]. This suite is kept out of `npm test`.
Browser pass	`npm run test:qa:browser`	Writes `reports/qa-run/playwright.json`. Parallel runs set `QA_TENANT_ID`, `QA_BASE_URL` and `QA_PW_JSON`.
Merge results	`npm run qa:report`	Writes `RESULTS.md` and `results.json`.
This PDF	`npx tsx scripts/qa-pdf.ts`	Writes `reports/qa-run/SahulatERP-SQA-Report.pdf`.
Reset a QA company	`npm run qa:tenant`	Touches only the disposable QA tenants.

Artefacts

- `docs/qa/README.md`: master test plan, entry and exit criteria, and invariants.
- `docs/qa/cases/`: the 2,000 cases.
- `tests/qa/`: engine-pass tests; `tests/qa-browser/`: browser-pass specs.
- `reports/qa-run/DEFECTS.md`: defect register; `RESULTS.md`: per-case results.

Appendix A. Every case and its result

Layer: E = engine pass, B = browser pass, E+B = both. Case text is as written in the pack; see section 6 for corrections.

Sign-in, password reset, sessions (AUTH): 83 pass · 0 fail · 17 manual

ID	P	T	CASE	EXPECTED	LAYER	RESULT
AUTH-001	P1	F	Open `/` signed out	"Welcome back" login screen, email field, password field, "Sign in securely", "Forgot your password?"	E	Pass
AUTH-002	P1	F	Sign in with valid email and password	Lands on the member's own company (Overview or setup card); no error	B	Pass
AUTH-003	P1	N	Wrong password	Error under the form; stays on login; password field kept focusable; no page reload	B	Pass
AUTH-004	P1	N	Unknown email	Same generic error as wrong password (no account enumeration)	B	Pass
AUTH-005	P2	N	Empty email, click sign in	Browser/HTML validation blocks submit; no request sent	E	Pass
AUTH-006	P2	N	Empty password	Blocked client-side	E	Pass
AUTH-007	P2	E	Email with surrounding spaces `user@x.com`	Trimmed and accepted	B	Pass
AUTH-008	P2	E	Email in different case `USER@X.COM`	Accepted (Supabase emails are case-insensitive)	B	Pass
AUTH-009	P3	E	Password with leading/trailing spaces	Not trimmed; must match exactly what was set	B	Pass
AUTH-010	P2	E	200-character password	Accepted if it matches; no truncation	B	Pass
AUTH-011	P2	N	SQL-ish email `' OR 1=1--@x.com`	Generic failure; no 500	B	Pass
AUTH-012	P2	N	Script tag in email field	Rendered as text in any error; no XSS	B	Pass
AUTH-013	P2	E	Unicode email local part	Rejected by email validation or generic failure; no crash	B	Pass
AUTH-014	P2	F	Toggle password visibility (eye icon)	Characters shown/hidden; cursor position kept	B	Pass
AUTH-015	P3	U	Tab order	Email → password → eye → sign in → forgot link	E	Pass
AUTH-016	P2	F	Press Enter in password field	Submits the form	B	Pass
AUTH-017	P2	F	Double-click "Sign in securely"	One request; button shows spinner and is disabled while busy	B	Pass
AUTH-018	P1	F	Sign in, reload the page	Still signed in (cookie session)	B	Pass
AUTH-019	P1	F	Sign out from the sidebar profile button	Returns to login; back button does not show workspace content	B	Pass
AUTH-020	P1	S	After sign-out, open `/api/workspace` directly	401	E	Pass
AUTH-021	P1	S	After sign-out, POST a command with a stale cookie	401 and nothing changes	E	Pass
AUTH-022	P2	F	Sign in with `?tenant=<own tenant>` in the URL	Lands on that tenant, query preserved through the redirect	E	Pass
AUTH-023	P1	S	Sign in with `?tenant=<tenant you are not a member of>`	Falls back to your own company; no data from the other tenant	E	Pass
AUTH-024	P2	E	`?tenant=not-a-uuid`	Ignored; own company shown	E	Pass
AUTH-025	P2	E	`?tenant=` (empty)	Ignored	E	Pass
AUTH-026	P2	F	Member of a demo company and an own company, no `?tenant`	Lands on the own (non-demo) company	E	Pass
AUTH-027	P2	F	Member of two non-demo companies, no `?tenant`	Lands on the first by membership order; switcher lists both	E	Pass
AUTH-028	P1	F	Account with no memberships	"No workspace assigned" screen with Sign out	E	Pass
AUTH-029	P2	F	Member whose membership is inactive	Treated as no membership for that company	E	Pass
AUTH-030	P2	F	Member whose tenant snapshot is missing	"Workspace unavailable" screen, no stack trace	E	Pass
AUTH-031	P1	F	"Forgot your password?" with a valid email	Confirmation text shown; reset email arrives with link to `/auth/callback?next=/account/reset`	—	Manual
AUTH-032	P2	N	Forgot password with empty email	Validation; no request	E	Pass
AUTH-033	P2	S	Forgot password with unknown email	Same confirmation text (no enumeration)	B	Pass
AUTH-034	P2	E	Forgot password twice quickly	Second request accepted or rate-limited with a clear message; no 500	—	Manual
AUTH-035	P1	F	Open reset link	Reset page "Choose a password of at least 8 characters"	E	Pass
AUTH-036	P1	F	Set new password of 8 chars	Saved; can sign in with it; old password fails	—	Manual
AUTH-037	P1	N	New password of 7 chars	Refused with length message	B	Pass
AUTH-038	P2	N	New password empty	Blocked	B	Pass
AUTH-039	P2	E	New password 72+ chars	Accepted or refused with a clear message; never silently truncated	—	Manual
AUTH-040	P2	E	New password equal to old password	Accepted (no history policy) or clear refusal	—	Manual
AUTH-041	P1	N	Open reset page without a valid session	"Expired" state with link back to login	B	Pass
AUTH-042	P2	N	Reuse the reset link after success	Expired state	—	Manual
AUTH-043	P2	E	Reset link opened in a different browser	Works (token in link) or expired state; never a blank page	—	Manual
AUTH-044	P2	F	`/auth/callback` without `code`	Redirects to login without error	E	Pass
AUTH-045	P2	N	`/auth/callback?code=garbage`	Redirects to login; no 500	E	Pass
AUTH-046	P2	S	`/auth/callback?next=https://evil.com`	Open redirect refused; stays on the app	E	Pass

ID	P	T	CASE	EXPECTED	LAYER	RESULT
AUTH-047	P2	S	`/auth/callback?next=//evil.com`	Same	E	Pass
AUTH-048	P3	F	`/auth/signout` via GET	Method not allowed or no-op; POST only signs out	E	Pass
AUTH-049	P2	F	Sign out in one tab, act in another tab	Other tab's next command gets 401 and the UI shows the login	B	Pass
AUTH-050	P2	F	Session expiry after the refresh token lapses	Next navigation returns to login; no infinite spinner	B	Pass
AUTH-051	P2	F	Two accounts in two browsers simultaneously	Independent sessions; each sees only its memberships	—	Manual
AUTH-052	P2	F	Same account in two tabs	Both work; commands from both apply	B	Pass
AUTH-053	P3	U	Login page at 390px wide	Single column, inputs 16px font, no zoom on focus, no horizontal scroll	B	Pass
AUTH-054	P3	U	Login right-hand panel at <900px	Hidden; form fills the width	E	Pass
AUTH-055	P3	U	Brand mark and "SahulatERP" wordmark	Gradient mark, violet "ERP"	E	Pass
AUTH-056	P3	U	Benefit list on the right	Three plain lines, no fake statistics	E	Pass
AUTH-057	P3	U	No "Working prototype" or "simulated" copy anywhere on login	Confirmed absent	E	Pass
AUTH-058	P3	U	Reduced-motion OS setting	No slide animations on login	B	Pass
AUTH-059	P2	F	Password manager autofill	Both fields filled; sign in works	—	Manual
AUTH-060	P2	F	Browser back after signing in	Does not return to the login form with the app signed in	B	Pass
AUTH-061	P2	E	Sign in while offline	Clear network error; retry works when online	B	Pass
AUTH-062	P2	E	Sign in while Supabase auth is slow (>10s)	Spinner persists; no duplicate submit; eventually resolves	B	Pass
AUTH-063	P2	S	Inspect network: password sent only over HTTPS to Supabase	No password in URL or logs	B	Pass
AUTH-064	P2	S	Response headers of `/`	No service-role key or secrets in HTML/JS	E	Pass
AUTH-065	P2	S	Cookies	HttpOnly/secure session cookies; no token in localStorage	E	Pass
AUTH-066	P1	S	Reset-password flow for a user, then sign in as another user in same browser	No cross-user leakage	—	Manual
AUTH-067	P2	F	Member created by `npm run member:create` with MEMBER_DEMO=1	Can sign in; sees own company and demo company	—	Manual
AUTH-068	P2	F	`member:create` for an existing email	Password updated; no second company created	E	Pass
AUTH-069	P2	N	`member:create` without MEMBER_PASSWORD	Script fails with a clear message	E	Pass
AUTH-070	P2	F	`company:reset` for a member	Next sign-in shows setup card; account unchanged	—	Manual
AUTH-071	P2	N	`company:reset` for an email with no account	Script error "No account for …"	E	Pass
AUTH-072	P2	N	`company:reset` for a member with two own companies	Script refuses ("Expected exactly one own company")	E	Pass
AUTH-073	P3	U	Error message wording for wrong password	Plain English, no Supabase internals	B	Pass
AUTH-074	P3	U	Focus ring on inputs	Violet ring, visible with keyboard	B	Pass
AUTH-075	P3	U	Dark-mode OS setting	App stays light (light-only product); theme-color matches	E	Pass
AUTH-076	P2	E	Email 254 chars	Accepted by validation or clear error	B	Pass
AUTH-077	P2	E	Paste email with newline	Newline stripped or rejected; no crash	B	Pass
AUTH-078	P3	E	Emoji as password	Works if it was set that way	B	Pass
AUTH-079	P2	S	20 failed logins in a minute	Rate limit or lockout message from Supabase surfaced cleanly	—	Manual
AUTH-080	P2	F	Auditor signs in to a company still in setup	"… is being set up" screen with Sign out, never the wizard	E	Pass
AUTH-081	P2	F	Non-owner role signs in to a company in setup	Setup card shown (any member can finish setup)	E	Pass
AUTH-082	P2	F	Sign-in landing when `?tenant` is a demo company you belong to	Demo company opens; sidebar shows "Demo workspace"	E	Pass
AUTH-083	P3	U	Loading state on first paint before hydration	Buttons disabled until hydrated; no lost clicks	E	Pass
AUTH-084	P2	F	Refresh on `/account/reset` after a successful change	Shows expired/complete state, not the form	B	Pass
AUTH-085	P2	S	Reset page with another user's recovery token	Only that token's user is changed	—	Manual
AUTH-086	P3	E	Browser with cookies disabled	Login fails with a clear message; no loop	—	Manual
AUTH-087	P3	E	Browser with JavaScript disabled	Static login renders; submit does nothing harmful	E	Pass
AUTH-088	P2	F	Sign in with an email that has a plus tag `a+qa@x.com`	Works	B	Pass
AUTH-089	P3	U	Forgot-password confirmation copy	Says to check email; does not reveal whether the account exists	E	Pass
AUTH-090	P2	F	Sign out while a command is in flight	Command may complete server-side; UI returns to login without error	B	Pass
AUTH-091	P2	S	`/api/branding/logo` while signed out	401	E	Pass
AUTH-092	P2	S	`/print/sales_invoice/<id>` while signed out	Login or 401, never the document	E	Pass
AUTH-093	P2	F	Deep link `/print/...` then sign in	After sign-in the user reaches the app (returning to the deep link is acceptable)	B	Pass
AUTH-094	P3	U	Page title on login	"SahulatERP · Your business, connected"	E	Pass
AUTH-095	P3	U	Favicon present	Yes	E	Pass
AUTH-096	P2	E	Very slow network (3G throttle)	Login usable; no duplicate submissions	B	Pass
AUTH-097	P2	F	Sign in, change password elsewhere, continue	Existing session continues until refresh fails, then login	—	Manual
AUTH-098	P2	S	Member removed from a company while signed in	Next load falls back to remaining companies or "No workspace assigned"	E	Pass

ID	P	T	CASE	EXPECTED	LAYER	RESULT
AUTH-099	P3	U	Screen reader on login	Inputs labelled "Email address", "Password"; button text read	E	Pass
AUTH-100	P2	F	Full round trip: sign up by script → sign in → setup → sign out → forgot → reset → sign in	All steps succeed end to end	—	Manual

Onboarding wizard and provisioning (ONB): 99 pass · 0 fail · 1 manual

ID	P	T	CASE	EXPECTED	LAYER	RESULT
ONB-001	P1	F	Sign in to a fresh company	Centred setup card over blurred dashboard; "Step 1 of 4"; stepper shows Company highlighted	E	Pass
ONB-002	P1	F	Company name + address, Continue	Step 2 Documents; progress bar grows to 50%	E	Pass
ONB-003	P1	N	Continue with empty name	"Enter the company name and address."	E	Pass
ONB-004	P1	N	Name of 1 character	Same refusal	E	Pass
ONB-005	P1	N	Name filled, address empty	Same refusal	E	Pass
ONB-006	P2	E	Name of exactly 2 characters	Accepted	E	Pass
ONB-007	P2	E	Name 120+ characters	Accepted or trimmed with clear limit; invoice preview does not overflow	E	Pass
ONB-008	P2	E	Name with emoji and Urdu script	Saved and printed correctly	E	Pass
ONB-009	P2	E	Name with leading/trailing spaces	Trimmed	E	Pass
ONB-010	P2	E	Address with multiple lines	Preserved on documents	E	Pass
ONB-011	P2	F	Email prefilled with the signed-in email	Yes, editable	E	Pass
ONB-012	P2	N	Invalid email `abc`	Browser validation or saved as text; printed as typed	E	Pass
ONB-013	P2	F	Phone `+92 300 1234567`	Saved; shown on invoice header	E	Pass
ONB-014	P2	F	NTN optional field left blank	Allowed; "NTN / STRN" line absent on print	E	Pass
ONB-015	P2	F	Close the tab after step 1, sign in again	Resumes at step 2 with company saved	E	Pass
ONB-016	P2	F	Back from step 2 to step 1	Fields show saved values; slide-left transition	B	Pass
ONB-017	P1	F	Step 2: upload PNG logo under 1 MB	Preview updates; "Replace logo" button appears	E	Pass
ONB-018	P1	F	Upload JPG logo	Accepted	E	Pass
ONB-019	P2	N	Upload a 3 MB PNG as logo	Refused with size message	E	Pass
ONB-020	P2	N	Upload a PDF as logo	Refused by type	E	Pass
ONB-021	P2	N	Upload SVG as logo	Refused (no SVG by product decision)	E	Pass
ONB-022	P2	N	Upload a file renamed `.png` that is actually text	Refused or broken-image handled; no crash	E	Pass
ONB-023	P2	F	Upload letterhead (≤2 MB)	Replaces whole header in preview	E	Pass
ONB-024	P2	N	Letterhead 5 MB	Refused	E	Pass
ONB-025	P2	F	Pick each accent colour swatch	Preview heading/table colour changes immediately	E	Pass
ONB-026	P2	F	Custom colour input	Hex saved; preview updates	E	Pass

DAT-025	P2	D	Codec defaults for old snapshots (no modules/setup/branding/bankAccounts)	Filled; setup.complete = demo or hasData	E	Pass
DAT-026	P2	D	Snapshot with unknown extra keys	Preserved or dropped consistently	E	Pass
DAT-027	P2	D	Snapshot schema_version bump path	Documented	E	Pass
DAT-028	P2	D	Backup/restore of one tenant	Restored tenant reconciles	E	Pass
DAT-029	P2	D	Restore then rebuild projection	Equal	E	Pass
DAT-030	P1	D	Invariant sweep after restore	Balanced and reconciled	E	Pass
DAT-031	P2	D	Audit entries append-only; count equals commands	Yes	E	Pass
DAT-032	P2	D	Audit includes failed commands?	Documented (no)	E	Pass
DAT-033	P2	D	Revision monotonic +1 per commit	Yes	E	Pass
DAT-034	P2	D	Timestamps ISO with timezone	Yes	E	Pass
DAT-035	P2	D	`today()` in Asia/Karachi at 23:30 local vs UTC	Karachi date used	E	Pass
DAT-036	P2	D	Document dates stored as YYYY-MM-DD	Yes	E	Pass
DAT-037	P2	D	Numbering per year per prefix	Resets 1 Jan	E	Pass
DAT-038	P2	D	Numbering with cancelled docs	Number kept; no reuse	E	Pass
DAT-039	P2	D	Numbering width 4 then 10,000th doc	5 digits; still sorts	E	Pass
DAT-040	P2	D	IDs unique (uuid)	No collisions in 100k	E	Pass
DAT-041	P2	D	Party rename does not alter document references	ids stable	E	Pass
DAT-042	P2	D	Item rename	Lines keep itemId; print shows new name (document)	E	Pass
DAT-043	P2	D	Warehouse rename	Stable	E	Pass
DAT-044	P2	D	Archived flags survive edits	Yes	E	Pass
DAT-045	P2	D	Hidden module data survives on/off cycles	Yes	E	Pass

ID	P	T	CASE	EXPECTED	LAYER	RESULT
DAT-046	P2	D	Company reset script leaves other tenants untouched	Verified counts	E	Pass
DAT-047	P2	D	QA tenant reset leaves others	Verified	E	Pass
DAT-048	P2	D	Demo reset restores exact seed (hash)	Yes	E	Pass
DAT-049	P2	D	Snapshot size growth 10k documents	< 20 MB; page load acceptable or documented limit	E	Pass
DAT-050	P2	X	Command latency with 10k docs	< 1 s	E	Pass
DAT-051	P2	X	Page load with 10k docs	< 4 s	B	Pass
DAT-052	P2	D	Engine purity: same input twice	Same output	E	Pass
DAT-053	P2	D	Engine never mutates input on failure	Workspace unchanged after thrown error	E	Pass
DAT-054	P2	D	Partial failure in multi-step UI flows (save_party ok, create_document fails)	Party exists; user told; no orphan document	E	Pass
DAT-055	P2	D	Product saved, opening stock fails	Product exists; message; stock 0	E	Pass
DAT-056	P2	D	Submit fails after create (one-step)	Draft kept; retry updates same draft	E	Pass
DAT-057	P2	D	Walk-in account creation then document fails	Walk-in account exists (acceptable); documented	E	Pass
DAT-058	P2	D	Browser closed mid-command	Server completes; reload shows result	B	Pass
DAT-059	P2	D	Server restart mid-commit	Transaction atomic	E	Pass
DAT-060	P2	D	DB unreachable	500 with generic message; retry later works	E	Pass
DAT-061	P2	D	Storage unreachable on logo upload	Error; branding unchanged	E	Pass
DAT-062	P2	D	Supabase auth slow	UI waits; no duplicate	—	Manual
DAT-063	P2	D	Clock skew client vs server	Dates from client date fields; server validates format only	E	Pass
DAT-064	P2	D	Period lock enforced server-side regardless of client date	Yes	E	Pass
DAT-065	P2	D	Role enforced server-side regardless of UI	Yes	E	Pass
DAT-066	P2	D	Module gate server-side	Yes	E	Pass
DAT-067	P2	D	Journal source uniqueness server-side	Yes	E	Pass
DAT-068	P2	D	Stock non-negative server-side	Yes	E	Pass
DAT-069	P2	D	Credit limit server-side	Yes	E	Pass
DAT-070	P2	D	Allocation sums server-side	Yes	E	Pass
DAT-071	P2	D	Validation errors return message and no change	Yes	E	Pass
DAT-072	P2	D	Unknown field in payload ignored	Yes	E	Pass
DAT-073	P2	D	Null vs empty string normalisation	Trimmed strings	E	Pass
DAT-074	P2	D	Unicode normalisation of names	NFC consistent (or documented)	E	Pass
DAT-075	P2	D	Whitespace-only inputs	Rejected where required	E	Pass
DAT-076	P2	D	Extremely long strings capped by schema	Yes	E	Pass
DAT-077	P2	D	Deep JSON nesting attack	Rejected by schema	E	Pass
DAT-078	P2	D	Prototype pollution keys `__proto__`	Ignored	E	Pass
DAT-079	P2	D	Duplicate lines in arrays caught (allocations, returns, lines)	Yes	E	Pass
DAT-080	P2	D	Order of lines preserved	Yes	E	Pass
DAT-081	P2	D	Snapshot JSON stable key order (diffability)	Not required; documented	E	Pass
DAT-082	P2	D	Projection `companies.setup_complete` mirrors snapshot	Yes	E	Pass
DAT-083	P2	D	Projection `enabled_modules` mirrors	Yes	E	Pass
DAT-084	P2	D	Projection journals balanced per journal (SQL check)	Yes	E	Pass
DAT-085	P2	D	Projection documents totals = snapshot	Yes	E	Pass
DAT-086	P2	D	Unit tests run against PGlite with real migrations	Pass	E	Pass
DAT-087	P2	D	pgcrypto available in test DB	Yes	E	Pass
DAT-088	P2	D	Playwright suites independent of order	Pass in any order	B	Pass
DAT-089	P2	D	Playwright global warm-up prevents compile 500s	Yes	B	Pass
DAT-090	P2	D	Client retries once on ≥500 with same key	Yes	E	Pass
DAT-091	P2	D	No retry on 4xx	Yes	E	Pass
DAT-092	P2	D	Error notice wording from server passes through	Yes	E	Pass
DAT-093	P2	D	Workspace in client refreshed from command result	Yes	E	Pass
DAT-094	P2	D	Stale tab commits from old revision	Conflict → retry with fresh workspace → applied	E	Pass
DAT-095	P2	D	1,000 commands sequentially	All applied; revision 1000	E	Pass
DAT-096	P2	D	Fuzz: 500 random valid commands	Invariants hold	E	Pass
DAT-097	P2	D	Fuzz: 500 random invalid commands	All refused; state unchanged	E	Pass
DAT-098	P2	D	Vercel deploy rollback	Previous build works with current snapshots (codec backward compatible)	—	Manual
DAT-099	P2	D	Forward compatibility: new field unknown to old client	Ignored safely	E	Pass
DAT-100	P1	D	Full invariant suite after everything in files 01–19	Balanced, reconciled, no duplicates, no negatives	E	Pass
